Kunjen Syntax A Generative View:

Kunjen Syntax B. A. Sommer, 1972 Based on data gathered between July 1964 and June 1970 first appeared as dissertation in partial fulfilment of Ph D requirements at University of Hawaii aims to present basic syntax of Oyikang and considers case grammar lists notational conventions conjunction case system noun phrases and sentence embedding nouns and classifiers pronominalisation modality constituent verbs imperatives and questions summary of Oyikang and rules sample text in Oyikang and with interlinear literal translation followed by free translation brief description of Olgol syntax Olgol text with interlinear literal translation followed by free translation *Morphology: Morphology: its relation to syntax* Francis Katamba, 2004 This six volume collection draws together the most significant contributions to morphological theory and analysis which all serious students of morphology should be aware of By comparing the stances taken by the different schools about the important issues the reader will be able to judge the merits of each with the benefit of evidence rather than prejudice *Phonology in the 1980s* Didier L. Goyvaerts, 1981-01-01 This volume brings together a number of groundbreaking papers in the theory of phonology *Papers from the VIth International Conference on Historical Linguistics, Poznań, 22-26 August 1983* Jacek Fisiak, 1985-01-01 This volume presents a selection of papers from the 6th International Conference on Historical Linguistics ICHL which was held in 1983 in Poznań Poland **A Grammar of Yidin** R. M. W. Dixon, 1977-10-06 Professor Dixon examines the grammar of Yidin an Australian dying language through phonology syntax and of a mixed ergative type that cannot easily be accommodated in terms of standard syntactic theory **Highly complex syllable structure: A typological and diachronic study** Shelece Easterday, 2019-11-13 The syllable is a natural unit of organization in spoken language whose strongest cross linguistic patterns are often explained in terms of a universal preference for the CV structure Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized with few approaches treating these as natural or unproblematic structures This book is an investigation of the properties of languages with highly complex syllable patterns The two aims are i to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language These issues are investigated in a diversified sample of 100 languages 25 of which have highly complex syllable patterns Languages with highly complex syllable structure are characterized by a number of phonetic phonological and morphological features which serve to set them apart from languages with simpler syllable patterns These include specific segmental and suprasegmental properties a higher prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress timed and consonantal languages The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic

development of these patterns out of simpler syllable structures *Studies in Syntactic Typology* Michael Hammond, Edith A. Moravcsik, Jessica R. Wirth, 1988-01-01 The papers in this volume are revised versions of presentations at the conference on Language Universals and Language Typology in March 1985 at the University of Wisconsin Milwaukee They include new proposals of universals results of investigations to validate or refine previously proposed universal generalizations and discussions concerning the explanation of universals The volume will be of great interest to researchers in syntax and in language universals In addition scholars in pragmatics philosophy of linguistics psycholinguistics anthropological linguistics and semantics will also find articles of interest in the book **A Grammar and Lexicon of Yintyingka** Jean-Christophe Verstraete, Bruce Rigsby, 2015-03-10 This book provides a description of Yintyingka a Pama Nyungan language of Cape York Peninsula in Australia The language is no longer spoken but the analysis is based on a range of archival materials from the 1920s to the 1990s as well as the authors fieldwork experience with neighbouring languages This book pays special attention to the language in its social context historical comparative analysis and the methods used to analyse the archival material

Radical Construction Grammar William Croft, 2001 Radical Construction Grammar presents a profound critique of syntactic theory and argumentation and offers a genuinely new approach to syntax based on the fact of grammatical diversity Recent syntactic theories are essentially formal models for the representation of grammatical knowledge and posit complex syntactic structures in the analysis of sentences The result has been an endless cycle of new and revised theories of syntactic representation Radical Construction Grammar argues that this approach to syntax is incompatible with the grammatical variation found within and across languages This book defends three fundamental theses i constructions are the primitive units of syntactic representation and grammatical categories are defined by constructions not the other way around ii the only syntactic structures are the part whole relations between a construction and the syntactic elements that make it up iii not only are grammatical categories construction specific but constructions are language specific In other words syntactic structure is almost entirely language specific attempts to find a universal formal model are doomed to failure Radical Construction Grammar integrates concepts from typological theory and construction grammar to uncover the genuine universals of grammar Constructions are represented as complex symbolic units pairing form and meaning The semantic map model of typological theory is used to map category distributions on a largely universal conceptual space Universals of grammar are found in the mapping of meaning onto form Systematic patterns of grammatical variation provide evidence for the topography of conceptual space which in turn reflects the geography of the human mind **Causatives and Causation** Jae Jung Song, 2014-06-11 Causatives and Causation is the first comprehensive study of causative constructions found in the world's languages This important new research based on a data base of more than 600 languages not only investigates fully the richness and variety of causative types but also presents an alternative perspective to the traditional typological approach The new typology enables a better understanding of how the human mind cognizes causation and how this is

reflected in language Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology Drawing on the theoretical insight of Role and Reference Grammar this book provides a case study of the causative constructions in Korean providing additional support for both the proposed new typology and the diachronic model It also examines the pragmatic foundations of causatives an important but previously unexplored area of study *For the Gospel's Sake* Boone Aldridge,2018-04-12

Informed take on the amazing growth of a very unusual missionary organization The two sided mission organization comprising Wycliffe Bible Translators and the Summer Institute of Linguistics is a paradox that begs for an explanation The Summer Institute has long been doing laudable linguistic humanitarian work in many countries while Wycliffe has been one of the largest fastest growing and most controversial Christian missionary enterprises in the world In this wide ranging study Boone Aldridge a religious historian and twenty year insider at WBT SIL looks back at the organization s early years from its inception in the 1930s to the death of its visionary founder William Cameron Townsend in 1982 He situates the iconic institution within the evolving landscape of mid twentieth century evangelicalism examines its complex and occasionally confusing policies and investigates the factors that led despite persistent criticism from many sides to its remarkable rise to prominence **The Roth Family, Anthropology, and Colonial Administration** Russell McDougall,Iain Davidson,2016-06-03

This volume serves the reader as a family biography a slice of the English colonial history and an important introduction to the history of anthropology **Papers from the 6th International Conference on Historical Linguistics** Jacek Fisiak,1985-01-01 This volume presents a selection of papers from the 6th International Conference on Historical Linguistics ICHL which was held in 1983 in Pozna Poland *Linguistic Typology* Jae Jung Song,2014-09-15

Language typology is the study of the structural similarities between languages regardless of their history to establish a classification or typology of languages It is a core topic of historical linguistics and is studied on all traditional linguistics degree courses In recent years there has been increased interest the subject and it is an area we have been looking to commission a book in Jae Jung Song proposes to introduce the undergraduate reader to the subject with discussion of topics which include what is language typology and why is it studied word order language sampling relative clauses diachronic typology and applications of language typology There will also be discussion of the most prominent areas of research in the subject and readers will be able to review data selected from a wide range of languages to see how languages work and how differently they behave *Handbook of Australian Languages* Robert M. W. Dixon,Barry J. Blake,1979 This handbook makes available short grammatical sketches of Australian languages Each grammar is written in a standard format following guidelines provided by the editors and includes a sample text and vocabulary text The contributions to this volume are salvage studies giving all the information that is available on four languages which are on the point of extinction and an assessment of what linguistic impressions can be inferred from the scant material that is available on the extinct languages

of Tasmania **Australian Aboriginal Grammar (RLE Linguistics F: World Linguistics)** Barry Blake, 2014-01-10 This study covers a number of topics that are prominent in the grammars of Australian Aboriginal languages especially ergativity and manifestations of the hierarchy that runs from the speech act participants down to inanimates This hierarchy shows up in case marking number marking and agreement advancement and cross referencing Chapter 1 provides an overall picture of Australian languages Chapters 2 3 and 4 deal with case systems including voice alternations and other advancements Chapter 5 deals with the distribution of case marking within the noun phrase Chapter 6 deals with systems that allow the cross referencing of bound pronouns Chapter 7 deals with clauses which appear to have more than one verb Chapter 8 deals with compound and complex sentences Chapter 9 deals with word order and emphasises a theme introduced in Chapter 5 namely the widespread use of discontinuous phrases Chapter 10 draws together ergativity and various manifestations of the hierarchy and attempts to interpret their distribution The final section provides an interesting hypothesis about the evolution of core grammar in Australia Speaking Kunjen B. A. Sommer, 2006 This book examines the interface between language and kinship in the Australian Aboriginal language Kunjen which is spoken in the Cape York region of northern Queensland The author shows that kinship relations play a major role in determining the kinds of linguistic interactions that are appropriate for different groups of individuals The social meaning of utterances depends more than anything else on kinship and one's kin relations with those one communicates with The rules of interpretation used by Kunjen speakers to mediate kinship and language are as complex and as pervasive as the grammatical rules of the language itself and help to reveal aspects of linguistic structure that might not otherwise be obvious Conversely kinship structures can be illuminated if not revealed by the study of language use Handbook of Australian Languages R.M.W. Dixon, Barry J. Blake, 1981-12-31 This handbook makes available short grammatical sketches of Australian languages Each grammar is written in a standard format following guidelines provided by the editors and includes a sample text and vocabulary text The contributions to this volume are salvage studies giving all the information that is available on four languages which are on the point of extinction and an assessment of what linguistic impressions can be inferred from the scant material that is available on the extinct languages of Tasmania **Where have All the Adjectives Gone?** R. M. W. Dixon, 2010-12-14 No detailed description available for Where have All the Adjectives Gone *Sound Symbolism* Leanne Hinton, Johanna Nichols, John J. Ohala, 1994 A study of the relationship between the sound of an utterance and its meaning
