## **Exorcising The Trouble Makers Magic Science And Culture:**

Exorcising the Trouble Makers Francis L. K. Hsu, 1983-12-27 The very human need for religion and magic as supplements to scientific and technological knowledge is the subject of this work In 1942 Hsu witnessed a cholera epidemic in a small rural settlement in Yunnan province China and found that contrary to anthropological expectations the Chinese responded to the crisis with a combination of conciliatory rituals and practical hygienic measures More than thirty years later he witnessed the elaborate ritualistic preparations for another epidemic in the Shatin sub division of Hong Kong and found the supernatural empirical response to be virtually the same as in 1942 The author argues that in spite of technological and intellectual sophistication the human psychic need for magic and religion persists He pursues this contention in a longitudinal analysis of this phenomenon in the South Seas East Africa and Indian and white America

**Non-Western Cultures** Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both

physical order of local communities It also looks at how politicians conceived of their own ritual role in an era when authority was meant to derive from popular sovereignty The claims of secular nationalism and mobilizational politics prompted the Nationalists to conceive of the world of religious association as a dangerous realm of superstition that would destroy the nation This is the first superstitious regime of the book's title It also convinced them that national feeling and faith in the party state would replace those ties the second superstitious regime
