Deviney,2018-07-31 The awakening begins in an ascending consciousness with an unspecified dissatisfaction regarding the established rules and assumptions You cannot identify the irritation but it feels as if there should be something more Because of this you begin to look for answers outside of the normal channels and your awakening commences The messages for awakening are as diverse as their sources because they are designed to reach different levels of consciousness yet the truth is always the truth though the form it takes may vary Expansion for Ascending Consciousness is a cooperative effort to provide a basis for understanding consciousness and the energy construct we exist within The intent is to remove the mysticism surrounding consciousness and embodied experience While complex and miraculous in its design consciousness is scientifically explainable and the foundation upon which the universe has been created As an ascending collective you have reached a time in your development where mysticism has outlived its usefulness Truth comes in many forms and thus the information you gravitate to at any given moment is dependent upon what resonates with your current level of awakening At a point in this process you will look back upon the information you have accumulated and see that each one was a step that incrementally raised your awareness Expansion for Ascending Consciousness contains the next step along this path of ascension **From Bourbon Street to the Twelfth Dimension** Rachel Otto,2024-02-01 We are all true divine love an

INTEGRATIVE HOLISTIC HEALTH, HEALING, AND TRANSFORMATION Penny Lewis, 2002-01-01. The goal of this book is to begin to present the fundamental body of knowledge which informs current approaches in complementary and alternative medicine and to explore the role of the new professions of integrative holistic health practitioner, consultant, and administrator. This book is designed to compliment, enhance, deepen, and broaden the reader's existing expertise through an integrative approach which will improve his/her ability to consult, design programs, and work in a variety of settings with various populations, including those with medical and psychological conditions as well as those who wish to support their health and well-being. The book provides the necessary conceptual, foundational frameworks for exploring how practitioners in a field of alternative medicine, holistic health, know what they know in support of their work. These core ways of knowing give them a foundation for evaluating their work, new advances in the field, and affords them interrelated frames of knowledge for their continued research, expansion, and integrative work in the field. Trained holistic health practitioners who may have applied one or more of these paradigms may now be able to expand their foundational and conceptual base, thereby broadening their theory and techniques that are appropriate to their professional arenas. Section I is designed to explore general ways of knowing and meaning-making in holistic health. Section II is designed to offer the reader practitioner methodology regarding the creation and implementation of holistic health centers, programs, and integrated consultation practices. Finally, Section III offers examples of integrative holistic health clinicians who combine and synthesize a variety of holistic health approaches and paradigms into their practices as practitioners, healers, therapists, and consultants.
