Expectation And Anticipation:

Self-Regulation in Activity Theory Gregory Z. Bedny, Waldemar Karwowski, Inna Bedny, 2018-10-03 Every complex human machine system includes a computer as a critically important means of work. However, an operator's interaction with a computerized system cannot be reduced to only performing computer-based tasks. Today, human computer interaction (HCI) is not limited to trained software users. People of all ages use all different kinds of gadget.

Emotion and Reason Warren D. TenHouten, 2014-06-23 Although much academic work has been done on the areas of mind, brain, and society, a theoretical synthesis of the three levels of analysis: the biological, the mental, and the social, has not until now been put forward. In *Emotion and Reason*, Warren TenHouten presents a truly comprehensive classification of the emotions. The book analyzes six key emotions: anger, acceptance, aggressiveness, love, joy, and happiness, and anticipation. It places them in historical context, relates them to situations of work and intimacy, and explains their functioning within an individuated, autonomous character structure. Divided into four parts, the book presents a socioevolutionary theory of the emotions: Affect spectrum Theory (AST), which is based on a synthesis of three models of the emotions of social relationships and of cognition. This book will be of value to undergraduate and postgraduate students as well as researchers with an interest in the sociology of emotions, anthropology of emotions, social psychology, affective neuroscience, political science, behavioral neuroscience, and philosophy.

The Intertwining of Aesthetics and Ethics Jadranka Skorin-Kapov, 2016-04-21 *The Intertwining of Aesthetics and Ethics: Exceeding of Expectations*. Ecstasy, Sublimity analyzes the common experiential ground for both aesthetics and ethics by considering experiential environment, both nature and art, the precedents to desire, the notion of experience, incorporating a break and the reverberations of surprise, leading to the intertwining of aesthetics and ethics. Jadranka Skorin-Kapov discusses different philosophical positions on the relationship between nature and art in conversation with Kant, Hegel, Goethe, Gadamer, and Adorno. She argues that Kantian sublimity can carry over from nature to art. As part of the discussions of expectations and authenticity, the author interprets Husserl's view on expectations, Heidegger's view on death and authenticity, Blanchot's view on death, and Arendt's view on natality. As for understanding the aesthetic experience as the paradigmatic experience, Skorin-Kapov is informed by Dewey's work on art as experience, Gadamer's work on experience of art, and Jauss's work on the aesthetics of reception and the horizon of expectations. After our sensibility and representational capability are broken, recuperation then leads to sublimity and the subsequent feelings of admiration and/or responsibility, allowing for the intertwining of aesthetics and ethics. Additionally, elements of Kantian morality, Foucault's ethics, and Kierkegaard's work on interactions between aesthetics and ethics together help to characterize the relation between aesthetics and ethics. Since we often encounter surprise due to unexpectedness in comedy, Skorin-Kapov also interprets philosophical views on the comedy and laughter, including Aristotle, Kierkegaard, Meredith, and Bergson, using the theatrical work of Dario Fo as an example. The novel analysis in *The Intertwining of Aesthetics and Ethics* will be of particular interest.
