Empowering Novice Academics for Student Success Dr Johann Hugo, 2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges. Student success is a burning issue both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfil different roles at different times such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development and student assessment. Against this background, the primary purpose of *Empowering novice academics for student success* is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughout.

Unleashing Your Leadership Potential Edith Luc, 2009-04-28 *Unleashing Your Leadership Potential* provides the means to unleash the unique capital of leadership inherent in each of us, making it possible for teams, organizations and society to improve the lives of others while we improve our own. Luc's leadership model is based on case studies and interviews with leaders providing insights about how excellent leaders developed their own leadership styles. Dr Luc's model presents seven strategies and underlying actions by which anyone, teacher or student, manager or subordinate, employee or community volunteer, parent or caregiver, can discover their leadership capability and then continuously improve it. This book is not a study of the skills needed for leadership since leaders come in all shapes and forms; rather, it is a guide for readers to use to develop into leaders without attending expensive workshops or time-consuming formal programs.

Leadership as a Habit of Mind Barbara Mackoff, Gary Wernet, 2005 *Leadership as a Habit of Mind* is an insightful and original work. The book is compulsively readable for its stories of personal experiences that have shaped the way leaders think and act. Even better, it offers a new concept: habits of mind that will help other leaders and would-be leaders to understand their own formative experiences and use them wisely.
