Foundations of the Everyday Eran Dorfman,2014-06-04 We are used to seeing the everyday as an ordinary aspect of life something that we need to overcome whereas it actually plays a crucial role in any event of our lives This highly original book engages with a range of thinkers and texts from across the fields of phenomenology psychoanalysis and critical theory including Husserl Heidegger Merleau Ponty Freud and Benjamin together with innovative analysis of French literature and the visual arts to demonstrate that the role of repetition and deferral in modernity has changed dramatically Rather than allowing the everyday gradually to integrate singular events into its repetitive texture events are experienced now as self enclosed entities allegedly disconnected from the everyday leading to its impoverishment The book thus offers a novel understanding of being body trauma and shock but within the framework of the everyday as a concept that deserves a theory of its very own

BOOK JACKET Foundations of Understanding Natika Newton,1996-01-01 How can symbols have meaning for a subject Foundations of Understanding argues that this is the key question to ask about intentionality or meaningful thought It thus offers an alternative to currently popular linguistic models of intentionality whose inadequacies

are examined the goal should be to explain not how symbols mental or otherwise can refer to or mean states of affairs in the external world but how they can mean something to us the users The essence of intentionality is shown to be conscious understanding the roots of which lie in experiences of embodiment and goal directed action A developmental path is traced from a foundation of conscious understanding in the ability to perform basic actions through the understanding of the concept of an objective external world to the understanding of language and abstract symbols The work is interdisciplinary data from the neurosciences and cognitive psychology and the perspectives of phenomenologists such as Merleau Ponty are combined with traditional philosophical analysis The book includes a chapter on the nature of conscious qualitative experience and its neural correlates Series A *Sensorimotor Foundations of Social Cognition* Andreas K. Engel,Paul F. M. J. Verschure,Danica Kragic,Daniel Polani,Alfred Oliver Effenberg,Peter König,2022-06-21 **The Foundations of Normal and Abnormal Psychology** Boris Sidis,1914 *Aristotle on Perceiving Objects* Anna Marmodoro,2014-07-02 How can we explain the structure of perceptual experience What is it that we perceive How is it that we perceive objects and not disjoint arrays of properties By which sense or senses do we perceive objects Are our five senses sufficient for the perception of objects Aristotle investigated these questions by means of the metaphysical modeling of the unity of the perceptual faculty and the unity of experiential content His account remains fruitful but also challenging even for contemporary philosophy This book offers a reconstruction of the six metaphysical models Aristotle offered to address these and related questions focusing on their metaphysical underpinning in his theory of causal powers By doing so the book brings out what is especially valuable and even surprising about the topic the core principles of Aristotle s metaphysics of perception are fundamentally different from those of his metaphysics of substance Yet for precisely this reason his models of perceptual content are unexplored territory This book breaks new ground in offering an understanding of Aristotle s metaphysics of the content of perceptual experience and of the composition of the perceptual faculty *Educational Foundations* ,1907 **Psychological Therapy** Klaus Grawe,2004-06-01 The original edition of Klaus Grawe s book exploring the basis and need for a more generally valid concept of psychotherapy fueled a lively debate among psychotherapists and psychologists in German speaking areas Now available in English this book will help spread the concepts and the debate among a wider audience The book is written in dialog form A practicing therapist a research psychologist and a therapy researcher take part in three dialogs each of which builds on the results of the previous dialog The first dialog explores how therapeutic change takes place while the second looks at how the mechanisms of action of psychotherapy can be understood in terms of basic psychological concepts Finally in the third dialog a psychological theory of psychotherapy is developed The practical implications of this are clearly shown in the form of case examples as well as guidance on indications and treatment planning The dialog ends with suggestions as to how therapy training and provision of psychotherapy could be improved on the basis of the model of psychotherapy that has been developed **Foundations of Low Vision** Anne Lesley Corn,Jane N. Erin,2010 Foundations of Low Vision Clinical

and Functional Perspectives the ground breaking text that highlighted the importance of focusing on the functional as well as the clinical implications of low vision has been completely updated and expanded in this second edition The revised edition goes even further in its presentation of how best to assess and support both children and adults with low vision and plan programs and services that optimize their functional vision and ability to lead productive and satisfying lives based on individuals actual abilities Part 1 Personal and Professional Perspectives provides the foundations of this approach with chapters focused on the anatomy of the eye medical causes of visual impairment optics and low vision devices and clinical low vision services as well as psychological and social implications of low vision and the history of the field Part 2 focuses on children and youths providing detailed treatment of functional vision assessment instruction use of low vision devices orientation and mobility and assistive technology Part 3 presents rehabilitation and employment issues for working age adults and special considerations for older adults
