Kirschner,Rob L. Martens,2006-04-11 A Dutch policy scientist once said the information and knowledge in the twenty first century has the shelf life of fresh fish and learning in this age often means learning where and how to find something and how to relate it to a specific situation instead of knowing everything one needs to know On top of this the world has become so highly interconnected that we have come to realise that every decision that we make can have repercussions somewhere else To touch as many bases as possible we need to work with knowledgeable others from different fields multiple agents and take heed of their points of view multiple representations To do this we make increasing use of computers and computer mediated communication If computer supported collaborative learning CSCL is not simply a newly discovered hype in education what is it and why are we writing a book about it Dissecting the phrase into its constituent parts we see that first of all CSCL is about learning and in the twenty first century this usually means constructivist learning The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 1 ISLS,2014-04-23 The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings Volume 1 Computer Support for Collaborative

**Data-Driven Design for Computer-Supported Collaborative Learning** Lanqin Zheng, 2021-08-11 This book highlights the importance of design in computer supported collaborative learning CSCL by proposing data driven design and assessment It addresses data driven design which focuses on the processing of data and on improving design quality based on analysis results in three main sections The first section explains how to design collaborative learning activities based on data driven design approaches while the second shares illustrative examples of computer supported collaborative learning activities In turn the third and last section demonstrates how to evaluate design quality and the fidelity of enactment based on design centered research The book features several examples of innovative data driven design approaches to optimizing collaborative learning activities highlights innovative CSCL activities in authentic learning environments demonstrates how learning analytics can be used to optimize CSCL design and discusses the design centered research approach to evaluating the alignment between design and enactment in CSCL Given its scope it will be of interest to a broad readership including researchers educators practitioners and students in the field of collaborative learning as well as the rapidly growing community of people who are interested in optimizing learning performance with CSCL      **What We Know About CSCL** Jan-Willem Strijbos, Paul A. Kirschner, Rob L. Martens, 2004-03-31 This book is the first that presents an overview of the main topics involved in the study and implementation of Computer Supported Collaborative Learning CSCL from a learning viewpoint It is also one of the few or the only one that does this from a research and practical instructional design

perspective Too many books begin with the medium and or the environments used for CSCL as if you would write a book on building a house by focusing almost primarily on hammers saws and screwdrivers The main topics are clustered in four sections that are derived from reverse ordering the CSCL acronym because CSCL is all about learning through collaboration that is supported by computers Although CSCL is increasingly advocated in higher education specific CSCL implementations i e something more than providing technology without a well developed educational rationale are uncommon in higher education The topics covered in this book each including a review and several examples of current best practices in higher education can stimulate informed implementation of CSCL in higher education
