establishing an IB school culture l ongoing IB professional development m time focused on IBDP n dedicated staff o change in staff and student perception p understanding of assessment and q structural support The key findings from the conceptual rating exercise were as follows by highest rated theme and sub theme in parenthesis when averaging all three participant groups a learning culture shared vision values b leadership and management adequate resources c practice and performance teacher choice d monitoring and assessment examiner feedback and e MYP DP transition program design My research confirmed much of the research conducted in previous studies but also added some new findings that could be useful to the IB community The most significant finding during the initial implementation phase was communication as all cases noted it as being essential to getting their IBDP off the ground Establishing a solid communication plan to reach all stakeholders helped schools establish awareness facilitated stakeholder buy in built positive beliefs around the benefits of the program and helped build excitement of younger students at lower grade levels Program preparation was also a relatively new finding as participants noted having structural supports ongoing IB training pre IB course development adequate resources and time to grow as key facilitators in IBDP implementation

construction and detailed empirical work allows him to offer new insights into social inequality in education systems credential theory and the IB Diploma      Secondary Education at the Crossroads Phillip Hughes, 2006-09-23 Education is a universal priority Currently it is at a crossroad In every society it is valued as a major road to produce more productive more harmonious and healthier citizens Yet in every setting there is deep dissatisfaction with the overall performance of education and there are major moves towards reform sometimes superficial but more often fundamental These reform processes have had only moderate and very uneven success Too often they are episodic reflecting a short term approach which is frequently changed for the latest enthusiasm or the most recent administration In Asia and the Pacific countries many systems are in the process of construction or reconstruction Can we learn from the experiences of others Given the multiplicity of efforts at reform and the variety of situations for reform there may well be lessons we can learn from each other s efforts and each others failures and successes This book features contributions from experienced researchers who have worked in many different settings and bring their own insights to attack this universal problem      *The International Baccalaureate* Ian Hill, Mary Hayden, 2010 Volume 4 Dr Ian Hill Deputy Director General of the IB charts the history of the organisation and the goal to create develop and implement a truly international curriculum and qualification
