Implications Of Modern Decision Science For Military Decision Support Systems:

Implications of Modern Decision Science for Military Decision-support Systems Paul K. Davis, Jonathan Kulick, Michael Egner, 2005 A selective review of modern decision science and implications for decision support systems The study suggests ways to synthesize lessons from research on heuristics and biases with those from naturalistic research It also discusses modern tools such as increasingly realistic simulations multiresolution modeling and exploratory analysis which can assist decisionmakers in choosing strategies that are flexible adaptive and robust Applied Cognitive Science and Technology Sumitava Mukherjee, Varun Dutt, Narayanan Srinivasan, 2023-08-23 This book fills the long pending gap in consolidating research on applied cognitive science and technology It explores the broader implications of interactions between human cognition and technology by touching upon artificial intelligence AI and artificial agents decision support and assistance support systems cybersecurity threats computational modeling of cognition through artificial neural networks and machine learning human factors engineering design and social media interfaces With an interdisciplinary scope that addresses psychological and technological issues this unique book shows how cognitive science is furthered by technology or platforms while simultaneously illustrating how the study of cognitive processes is helping shape technological products Accordingly it offers a valuable resource for researchers and practitioners in a broad array of fields such as psychology science engineering and management **Analysis, Analysis Practices, and Implications for Modeling and Simulation** Paul K. Davis, Amy E. Henninger, 2007 An examination of analysis and analysis practices for defense planning the paper's purpose is to delineate priorities for the way ahead i.e. for investments and other actions to ensure that future models and simulations will serve the needs of decisionmakers The analysis in question is accomplished for Quadrennial Reviews and for continuing work on capability assessments requirements analysis and program analysis *Theory and Methods for Supporting High Level Military Decisionmaking* Paul K. Davis, James P. Kahan, 2007 This report describes an approach to high level decision support for a Joint Forces Air Component Commander in combat operations or a Chief of Staff in defense planning Its central theme is the fundamental importance of dealing effectively with uncertainty whether in effects based operations building the Air Force's Commander's Predictive Environment or planning future forces with the methods of capabilities based planning Because many features of the future cannot be predicted with reasonable confidence it is better to proceed with the expectation of surprise developments and to have skill in recognizing adaptations and making them than it is to treat uncertainty merely as an annoyance This report sketches the framework of a high level decision support environment that is top down expresses concepts in simple and intuitive language deals explicitly with risk and uncertainty and provides the capability for decisionmakers to readily discover and question the bases for key assumptions and assessments It can accommodate both rational analytic and naturalistic decisionmakers allowing them to produce strategies that are flexible adaptive and robust FAR Two explicit methods and their related tools are described The first involves portfolio style thinking

and analysis a good mechanism for balancing risks and other considerations in choosing a course of action The second is a novel modification of foresight exercises that addresses the need to include humans effectively in dealing with uncertainty A more extensive discussion of available methods and enabling technologies is also presented along with some recommendations about investment priorities

Social Science for Counterterrorism Paul K. Davis, Kim Cragin, 2009
Employs an interdisciplinary social science approach to various counterterrorism questions problems and policies

Enhancing Strategic Planning with Massive Scenario Generation Paul K. Davis, Steven C. Bankes, Michael Egner, 2007 This report extends research on using scenarios for strategic planning with experiments in what can be called massive scenario generation MSG a computationally intensive technique that seeks to combine virtues of human and model based exploration of the possibility space The authors measure particular approaches to MSG against four metrics not needing a good initial model the dimensionality of the possibility space considered the degree of exploration of that space and the quality of resulting knowledge The authors then describe two MSG experiments for contrasting cases one that began with a reasonable but untested analytical model and one that began without an analytical model but with a thoughtful list of the conditions that might characterize and distinguish among circumstances in the situation considered a list derived from a combination of single analyst thinking and group brainstorming The authors experimented with a variety of methods and tools for interpreting and making sense of the data arising from MSG using ordinary linear sensitivity analysis a generalization using analyst inspired aggregation fragments some advanced filtering methods drawing on data mining and machine learning methods and motivated metamodeling On the basis of this preliminary work we conclude that MSG has the potential to expand the scope of what are recognized as possible developments provide an understanding of how those developments might come about and help identify aspects of the world that should be studied more carefully tested or monitored It should assist planners by enriching their mental library of the patterns used to guide reasoning and action at the time of crisis or decision and should help them identify anomalous situations requiring unusual actions Finally it should identify crucial issues worthy of testing or experimentation in games or other venues and in some cases suggest better ways to design mission rehearsals If MSG can be built into training education research and socialization exercises it should leave participants with a wider and better sense of the possible while developing skill at problem solving in situations other than those of the best estimate Much development is needed but prospects are encouraging

Advances in Culturally-Aware Intelligent Systems and in Cross-Cultural Psychological Studies Colette Faucher, 2017-11-03 This book offers valuable new insights into the design of culturally aware systems In its first part it is devoted to presenting selected Culturally Aware Intelligent Systems devised in the field of Artificial Intelligence and its second part consists of two sub parts that offer a source of inspiration for building modelizations of Culture and of its influence on the human mind and behavior to be used in new Culturally Aware Intelligent Systems Those sub parts present the results of experiments conducted in two fields that

study Culture and its influence on the human mind s functions Cultural Neuroscience and Cross Cultural Psychology In this era of globalization people from different countries and cultures have the opportunity to interact directly or indirectly in a wide variety of contexts Despite differences in their ways of thinking and reasoning their behaviors their values lifestyles customs and habits languages religions in a word their cultures they must be able to collaborate on projects to understand each other s views to communicate in such a way that they don t offend each other to anticipate the effects of their actions on others and so on As such it is of primary importance to understand how culture affects people s mental activities such as perception interpretation reasoning emotion and behavior in order to anticipate possible misunderstandings due to differences in handling the same situation and to try and resolve them Artificial Intelligence and more specifically the field of Intelligent Systems design aims at building systems that mimic the behavior of human beings in order to complete tasks more efficiently than humans could by themselves Consequently in the last decade experts and scholars in the field of Intelligent Systems have been increasingly tackling the notion of cultural awareness A Culturally Aware Intelligent System can be defined as a system where Culture related or more generally socio cultural information is modeled and used to design the human machine interface or to provide support with the task carried out by the system be it reasoning simulation or any other task involving cultural knowledge

U.S. Air Force Strategic Deterrence Analytic Capabilities National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on U.S. Air Force Strategic Deterrence Military Capabilities in the 21st Century Security Environment, 2015-01-02 Since the early 1960s the U S strategic nuclear posture has been composed of a triad of nuclear certified long range bombers intercontinental ballistic missiles and submarine launched ballistic missiles Since the early 1970s U S nuclear forces have been subject to strategic arms control agreements The large numbers and diversified nature of the U S nonstrategic tactical nuclear forces which cannot be ignored as part of the overall nuclear deterrent have decreased substantially since the Cold War While there is domestic consensus today on the need to maintain an effective deterrent there is no consensus on precisely what that requires especially in a changing geopolitical environment and with continued reductions in nuclear arms This places a premium on having the best possible analytic tools methods and approaches for understanding how nuclear deterrence and assurance work how they might fail and how failure can be averted by U S nuclear forces U S Air Force Strategic Deterrence Analytic Capabilities identifies the broad analytic issues and factors that must be considered in seeking nuclear deterrence of adversaries and assurance of allies in the 21st century This report describes and assesses tools methods including behavioral science based methods and approaches for improving the understanding of how nuclear deterrence and assurance work or may fail in the 21st century and the extent to which such failures might be averted or mitigated by the proper choice of nuclear systems technological capabilities postures and concepts of operation of American nuclear forces The report recommends criteria and a framework for validating the tools methods and approaches and for identifying those most

promising for Air Force usage **All the Facts** James W. Cortada, 2016-03-16 All the Facts presents a history of the role of information in the United States since 1870 when the nation began a nearly 150 year period of economic prosperity and technological and scientific transformations James Cortada argues that citizens and their institutions used information extensively as tools to augment their work and private lives and that they used facts to help shape how the nation evolved during these fourteen decades He argues that information's role has long been a critical component of the work play culture and values of this nation and no more so than during the twentieth century when its function in society expanded dramatically While elements of this story have been examined by thousands of scholars such as the role of radio newspapers books computers and the Internet about such institutions as education big business expanded roles of governments from town administration to the state house from agriculture to the services and information industries All the Facts looks at all of these elements holistically providing a deeper insight into the way the United States evolved over time An introduction and 11 chapters describe what this information ecosystem looked like how it evolved and how it was used For another vast layer of information about this subject the reader is directed to the detailed bibliographic essay in the back of this book It includes a narrative history case studies in the form of sidebars and stories illustrating key points Readers will find for example the story of how the US postal system helped create today's information society along with everything from books and newspapers to TV computers and the Internet The build up to what many today call the Information Age took a long time to achieve and continues to build momentum The implications for the world and not just for the United States are as profound as any mega trend one could identify in the history of humankind All the Facts presents this development thoroughly in an easy to digest format that any lover of history technology or the history of information and business will enjoy A Methodology for Developing Army Acquisition Strategies for an Uncertain Future John E. Peters, 2007 This monograph addresses the following two specific questions What should a robust acquisition investment strategy look like one designed to perform well against all anticipated threats How should the Army acquisition community assess the appropriateness of its investment strategy over time The study proposes adaptation of a RAND tool called Assumption Based Planning to help Army personnel maintain proper alignment between strategic guidance and the Army acquisition program and budget It uses this tool to create a model that recommends acquisition investments across a broad range of capabilities The model works toward the goal of satisfying the complex and evolving requirements specified in the national security guidance The model applies five main steps by identifying 1 the assumptions that underlie Army acquisition policy 2 load bearing assumptions i.e. important assumptions that underpin and shape Army acquisition plans 3 signposts or indicators that an assumption is becoming vulnerable 4 shaping actions that can be taken to keep assumptions viable and 5 hedging actions that can be taken to prepare for unwelcome but unpreventable developments For the acquisitions community shaping and hedging actions both take the form of investments Simulation and Wargaming Charles Turnitsa, Curtis Blais, Andreas Tolk, 2022-01-06

Understanding the potential synergies between computer simulation and wargaming Based on the insights of experts in both domains Simulation and Wargaming comprehensively explores the intersection between computer simulation and wargaming This book shows how the practice of wargaming can be augmented and provide more detail oriented insights using computer simulation particularly as the complexity of military operations and the need for computational decision aids increases The distinguished authors have hit upon two practical areas that have tremendous applications to share with one another but do not seem to be aware of that fact The book includes insights into The application of the data driven speed inherent to computer simulation to wargames The application of the insight and analysis gained from wargames to computer simulation The areas of concern raised by the combination of these two disparate yet related fields New research and application opportunities emerging from the intersection Addressing professionals in the wargaming modeling and simulation industries as well as decision makers and organizational leaders involved with wargaming and simulation Simulation and Wargaming offers a multifaceted and insightful read and provides the foundation for future interdisciplinary progress in both domains

Portfolio-analysis Methods for Assessing Capability Options Paul K. Davis,Russell D. Shaver,Justin Beck,2008 The research reported in this monograph is part of RAND s continuing work on practical theory and methods for capabilities based planning in the Department of Defense DoD and other organizations Its particular contribution is to describe and illustrate in some detail an analytic framework and methodology for defensewide capability area reviews including DoD s experimental Concept Decision Reviews and related evaluations of alternatives Krieg 2007 The monograph also describes newly developed enabling tools one for generating and screening preliminary options and one for evaluating in a portfolio analysis structure those options that pass screening Variants of the methods can be applied for analysis across capability areas or for strategic level defense planning i e force planning to establish the overall mix and balance of capabilities Finally the monograph illustrates concepts with applications to the capability areas of Global Strike and Ballistic Missile Defense BMD

AMERICAN NATIONAL SECURITY AND FOREIGN POLICY AN INTERNATIONAL PERSPECTIVE Samanga Amarasinghe,2014-02-26 This is a qualitative historical study of the United States National Security and Foreign Policies which encompasses Global Functional and Regional policies and their long term and short term impacts on the various theaters of operations

Simple Models to Explore Deterrence and More General Influence in the War with Al-Qaeda Paul K. Davis,2014-05-20 Deterring terrorism is best approached as part of a broad effort to influence all elements of a terrorist system and simple conceptual models of decisionmaking can help in understanding how to affect others behavior The paper lays out a theory of how to use influence to affect elements of a terrorist system touching on root causes individual motivation public support and likely factors in the decisionmaking of terrorist organizations

The Network Governance in Response to Acts of Terrorism Naim Kapucu,2012 Develops and applies a theoretical framework of collaborative decision making organizational behavior and networks to examine collaborative responses to terrorist attacks that have taken place in

the last 10 years across different national legal and cultural contexts Defense Modeling, Simulation, and Analysis
National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Modeling and Simulation for Defense Transformation, 2006-10-22 Modeling simulation and analysis MS A is a crucial tool for military affairs MS A is one of the announced pillars of a strategy for transforming the U S military Yet changes in the enterprise of MS A have not kept pace with the new demands arising from rapid changes in DOD processes and missions or with the rapid changes in the technology available to meet those demands To help address those concerns DOD asked the NRC to identify shortcomings in current practice of MS A and suggest where and how they should be resolved This report provides an assessment of the changing mission of DOD and environment in which it must operate an identification of high level opportunities for MS A research to address the expanded mission approaches for improving the interface between MS A practitioners and decision makers a discussion of training and continuing education of MS A practitioners and an examination of the need for coordinated military science research to support MS A Enabling Technologies for Simulation Science X Dawn A. Trevisani, 2006 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature *Mobility nodes as innovation hubs* Manfred Schrenk, 2008

Managing Risk in USAF Force Planning Frank A. Camm, 2009 Presents a risk management process would help senior Air Force leaders to 1 focus planning on the most salient threats 2 gain greater clarity on the risks associated with alternative courses of action across multiple futures 3 maintain a sense of the persistent uncertainties associated with any policy choice and 4 effectively communicate their judgments about risk to key audiences Marrying Prevention and Resiliency Brian A. Jackson, 2008 The uncertain nature of the terrorist threat is a fundamental challenge in the design of counterterrorism policy The author recommends a capabilities based portfolio approach to terrorism prevention planning Protective portfolios would combine preventative measures and mitigation and resiliency measures to deal with the uncertain nature of the terrorist threat

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
