*Foundations of Morality* George Frankl, 2001 Frankl examines the role of moral concepts in the life of societies and points to the interaction between neurotic and psychotic disturbances in individuals and the pathologies which periodically overwhelm societies moral values in the civilisation of the West and an upsurge of antisocial destructive behaviour When the moral directives upheld by a culture cease to be convincing anti moral attitudes of defiance will arise and an increasing number of people turn to crime violence and murder and an unrestrained self interest and greed with a profound weakening of social conscience will dominate the fabric of societies

**A Natural Scientist and a Social Scientist Explore the Dilemma of Science** Arnaldo K. Ventura, Angela Ramsay, 2003

*You Ought To!* Bernard Barnett, 2018-04-24 The superego is one of those psychoanalytic concepts that has been assimilated into ordinary language like repression the unconscious and the Oedipus complex Because it has become such a familiar notion its complexity may not always be appreciated nor the controversy that it can inspire Its origins for example its timing in the course of development whether and how it is influenced by gender all these questions and others have been the source of lively disagreement For psychoanalysts it is a fundamental concept of their discipline but it belongs to a meta psychology whose value is often questioned and opinions might vary on whether it remains truly alive as a generative energising idea in contemporary psychoanalysis

Contemporary Perspectives on Natural Law Ana Marta González, 2016-05-13 Resorting to natural law is one way of conveying the philosophical conviction that moral norms are not merely conventional rules Accordingly the notion of natural law has a clear metaphysical dimension since it involves the recognition that human beings do not conceive themselves as sheer products of society and history And yet if natural law is to be considered the fundamental law of practical reason it must show also some intrinsic relationship to history and positive law The essays in this book examine this tension between the metaphysical and the practical and how the philosophical elaboration of natural law presents this notion as a limiting concept between metaphysics and ethics between the mutable and the immutable between *is* and *ought* and in connection with the latter even the tension between politics and eschatology as a double horizon of ethics This book contributed to by scholars from Europe and America is a major contribution to the renewed interest in natural law It provides the reader with a comprehensive overview of natural law both from a historical and a systematic point of view It ranges from the mediaeval synthesis of Aquinas through the early modern elaborations of natural law up to current discussions on the very possibility and practical relevance of natural law theory for the contemporary mind

**THE TRUTH OF THE ORIGIN OF THE UNIVERSE** Sabrie Soloman, 2024-06-12 In a world filled with scientific explanations and theories it can be easy to lose sight of the ultimate truth of our existence The truth is that the universe with all its intricate complexities did not come into being by mere chance or a random explosion It was carefully designed and orchestrated by a higher power a Creator who holds everything together When we look up at the

night sky and see the countless stars and galaxies stretching out into infinity we cannot help but be in awe of the sheer magnitude and beauty of it all The heavens declare the glory of God as it says in the Bible and remind us of the greatness of the one who made it all The theory of the Big Bang which posits that the universe began as a singular point and expanded over billions of years is a flawed explanation for the origin of the universe It fails to account for the intricate design and order that we see in the cosmos as well as the existence of life on earth The marvel of our planet Earth with its perfect conditions for sustaining life points to a Creator who had a purpose and a plan in mind when he made it The countless galaxies and stars that we observe in the universe are a testament to the power and creativity of God They show us that we are part of a vast and wondrous creation one that was made by an intelligent designer who had a vision for it all The theory of evolution put forth by Charles Darwin is another flawed explanation for the diversity of life on earth It fails to explain the intricate complexities of living organisms and their unique design as well as the existence of the human soul It is clear that we are not the product of blind chance or random mutations but rather the handiwork of a loving and powerful Creator The truth of the origin of the universe points to a Creator who holds everything together and has a purpose and a plan for it all God stretches out the heavens and allows light to reach us here on earth showing us his care and provision for his creation We are not the product of random chance or blind evolution but rather the cherished creation of a loving God who made us in his image Let us never forget the marvel and wonder of the universe and the greatness of the one who made it all
