Feldman, Sheila B. Kamerman, 2001 Few aspects of American

military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.

**Human Behavior and the Social Environment, Macro Level**  
 Katherine van Wormer, Fred H. Besthorn, 2010-10-11

A timely revision in this global age, *Human Behavior and the Social Environment: Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. Integrates up-to-date research findings, models, and government statistics. Enhanced discussions of theory, group dynamics, family, community, and the environment. Theoretical concepts and practice implications in each chapter. Highlights the importance of the natural environment and ecology, the community of the earth, to human and group behavior. Sets forth a refined understanding of the role of spirituality, the community of faith, in people's lives. Focuses on evidence-based theory and research. Teaches from a global, cross-cultural perspective, highlighting themes of empowerment and social justice. Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic. Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at [www.oup.com/us/HBSE](http://www.oup.com/us/HBSE). Don't miss the companion volume *Human Behavior and the Social Environment: Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and

cultural forces influence individuals behavior      **Encyclopedia of Social Work** ,1965      Social Work and the Environment  
Michael Kim Zapf,2009 This ground breaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession      **The Foundations of Social Work Practice** Carol H. Meyer,Mark A. Mattaini,1995
