Lowe,2025-08-18 In this book Robert J Lowe introduces frame analysis a qualitative research approach grounded in the critical theory of the early Frankfurt School and framing in the social sciences Lowe sets out the principles of the frame analysis approach and provides a guide to conducting this kind of research in practice Focused on identifying and challenging ideology through immanent critique Lowe presents a methodological guide and research report He begins by explaining early critical theory and the frame analysis approach followed by a detailed example of its application This example illustrates the key stages identifying participants ideological presuppositions through their master framing questioning the internal logic of this framing and presenting contradictions to participants Finally the researcher observes reactions and documents emerging counter framing marking the first signs of resistance to dominant ideology By applying this approach to issues in English language teaching the book questions some of the ways in which the rhetoric of pluralism and diversity around English as an international language may stand at odds with the realities of a world in which some varieties of the language have more prestige than others Through the frame analysis approach the author suggests that researchers can play a role in empowering language learners and users to advocate for a world in which they can take true ownership of the language Key reading for all qualitative researchers and advanced students in applied linguistics sociolinguistics ELT TESOL and linguistic anthropology FRAME ANALYSIS AND PROCESSING IN DIGITAL VIDEO USING PYTHON AND TKINTER Vivian Siahaan,Rismon Hasiholan Sianipar,2024-03-27 The first project in chapter one which is Canny Edge Detector presented here is a graphical user interface GUI application built using Tkinter in Python This application allows users to open video files of formats like mp4 avi or mkv and view them along with their corresponding Canny edge detection frames The application provides functionalities such as playing pausing stopping navigating through frames and jumping to specific times within the video Upon opening the application users are greeted with a clean interface comprising two main sections the video display panel and the control panel The video display panel consists of two canvas widgets one for displaying the original video and another for displaying the Canny edge detection result These canvases allow users to visualize the video and its corresponding edge detection in real time The control panel houses various buttons
