Frame-Constructional Verb Classes Ryan Dux, 2020-11-15 While verb classes are a mainstay of linguistic research the field lacks consensus on precisely what constitutes a verb class This book presents a novel approach to verb classes employing a bottom up corpus based methodology and combining key insights from Frame Semantics Construction Grammar and Valency Grammar On this approach verb classes are formulated at varying granularity levels to adequately capture both the shared semantic and syntactic properties unifying verbs of a class and the idiosyncratic properties unique to individual verbs In depth analyses based on this approach shed light on the interrelations between verbs frame semantics and constructions and on the semantic richness and network organization of grammatical constructions This approach is extended to a comparison of Change and Theft verbs revealing unexpected lexical and syntactic differences across semantically distinct classes Finally a range of contrastive German English analyses demonstrate

how verb classes can inform the cross linguistic comparison of verbs and constructions *House documents* ,1891
