# Framing Compellent Strategies

**Patrick James, James M. Scott**

## **Framing Compellent Strategies:**

**Framing Compellent Strategies**, 2000 The United States occasionally seeks to compel or coerce others either nations or nonstate actors To do so it threatens use of force but ideally wants to prevail without actually using force The analytic language surrounding compellence focuses on point outcomes However most cases of compellence turn out not to have point outcomes but instead have been campaigns For example the United States was still dealing with Saddam Hussein almost a decade after Desert Storm In recent experience the task of compelling has seemed to vary across three broad categories each with a celebrated case in point compelling major regional adversaries Iraq compelling would be nuclear weapons proliferators India and compelling in circumstances rife with ambiguity involving such considerations as U S stakes who was to be compelled and how much control the targets of compellence had over their own forces Haiti Efforts to compel Milosevic appeared in terms of U S interests to straddle the Iraq and Haiti categories moreover the Kosovo campaign was conducted as our research proceeded and so it was added as a fourth case Other cases were examined in less detail in each category

*Framing Compellent Strategies* Gregory F. Treverton, 2000 The proximate targets of compellent campaigns are states or groups but the ultimate targets are individuals The challenge is to threaten or hold at risk what he or she cares most about This is true for all war perhaps all foreign policy but it is especially true when the United States seeks to prevail without using force and without necessarily defeating the adversary Focusing on three cases of compellence the first of which began by the United States seeking to compel Saddam Hussein to desist from both regional and domestic aggression the second seeking to discourage India from testing nuclear weapons the third seeking to force Cedras to step down and the Haitian military to allow Aristide to return to power the report outlines the important factors to consider in any compellent campaigns by questioning 1 who is to be compelled 2 how important U S stakes are 3 what threats and or inducements are relevant and 4 who is doing the compelling

**Conventional Coercion Across the Spectrum of Operations** David E. Johnson, Karl P. Mueller, William H. Taft (V.), 2002 The *raison d'être* for any military is to deter an adversary from acting inimically to a nation's interests or if deterrence fails to coerce him into ceasing the actions After defining terms and reviewing the literature on coercion this report looks at the utility of the military as a coercive instrument The authors analyze cases that provide insights into conventional coercion They conclude by stressing the unchanged nature of coercion and that only a thorough understanding of our adversaries and of our own will and capabilities will yield a successful coercive strategy

*Understanding Cyber Warfare* Christopher Whyte, Brian M. Mazanec, 2018-12-07 This textbook offers an accessible introduction to the historical technical and strategic context of cyber conflict The international relations policy doctrine strategy and operational issues associated with computer network attack computer network exploitation and computer network defense are collectively referred to as cyber warfare This new textbook provides students with a comprehensive perspective on the technical strategic and policy issues associated with cyber conflict as well as an

introduction to key state and non state actors Specifically the book provides a comprehensive overview of these key issue areas the historical emergence and evolution of cyber warfare including the basic characteristics and methods of computer network attack exploitation and defense a theoretical set of perspectives on conflict in the digital age from the point of view of international relations IR and the security studies field the current national perspectives policies doctrines and strategies relevant to cyber warfare and an examination of key challenges in international law norm development and the potential impact of cyber warfare on future international conflicts This book will be of much interest to students of cyber conflict and other forms of digital warfare security studies strategic studies defense policy and most broadly international relations

**No Shortcuts** Max Smeets,2022-06-02 Over the past decade numerous states have declared cyberspace as a new domain of warfare sought to develop a military cyber strategy and establish a cyber command These developments have led to much policy talk and concern about the future of warfare as well as the digital vulnerability of society No Shortcuts provides a level headed view of where we are in the militarization of cyberspace In this book Max Smeets bridges the divide between technology and policy to assess the necessary building blocks for states to develop a military cyber capacity Smeets argues that for many states the barriers to entry into conflict in cyberspace are currently too high Accompanied by a wide range of empirical examples Smeets shows why governments abilities to develop military cyber capabilities might change over time and explains the limits of capability transfer by states and private actors Inside the Situation Room Hillary Rodham Clinton,Keren Yarhi-Milo,2025-09-15 Combining decades of diplomacy and world renowned scholarship Inside the Situation Room bridges the gap between politics and academia to illuminate how world leaders make decisions in times of crisis For decades people have sought to understand how and why decisions are made in times of crisis but very few get the opportunity to witness leaders decision making process The result has been a persistent disconnect between the theory and the practice of decision making Now a former US Secretary of State has joined forces with a world renowned scholar to bridge that gap first in their ground breaking class at Columbia University s School of International and Public Affairs and now in the pages of this book In Inside the Situation Room Secretary Hillary Rodham Clinton and Dr Keren Yarhi Milo bring together insights from more than a dozen leading policymakers and scholars so readers can experience a masterclass in global policy and crisis decision making The book includes everything from the psychology and mechanics of threat assessment the role of advisors the effects of group think and trust real life stories of diplomatic efforts and covert operations how women have shaped decisions over peace and security and the impact of public opinion Inside the Situation Room offers an insider look at how decisions are actually made what theoretical insights might be useful to current and future generations of leaders and where research still needs to be done This book will serve as the first step toward a new standard engagement more active iterative collaboration among two communities scholars and practitioners who have a great deal to contribute and learn from one another **Regime Change** Robert Litwak,2007-01-30 The 9 11 terrorist attacks starkly

recast the U S debate on rogue states In this new era of vulnerability should the United States counter the dangers of weapons proliferation and state sponsored terrorism by toppling regimes or by promoting change in the threatening behavior of their leaders Regime Change examines the contrasting precedents set with Iraq and Libya and provides incisive analysis of the pressing crises with North Korea and Iran A successor to the author s influential Rogue States and U S Foreign Policy 2000 this compelling book clarifies and critiques the terms in which today s vital foreign policy and security debate is being conducted

**Conflict, Crisis, and War in World Politics** Patrick James, James M. Scott, 2025-01-09 This topical textbook outlines conflict crisis and war as central challenges in the international security arena exploring their history evolution nature dynamics and trends Patrick James and James M Scott discuss the major approaches to analysing conflict crisis and war and identify the key avenues for managing them

*Future War In Cities* Alice Hills, 2004-05-27 This book is the first full length study of a key security issue confronting the west in the twenty first century urban military operations as currently being undertaken by US and UK forces in Iraq It relates military operations in cities to the wider study of conflict and security in an era of urbanisation expeditionary warfare and new power

Missile Contagion Dennis M. Gormley, 2008-05-30 Most books on missile proliferation focus on the spread of ballistic missiles or cruise missiles not both Gormley s work however explains why cruise missiles are beginning to spread widely but does so by explaining their spread in the context of ballistic missile proliferation It therefore treats both ballistic and cruise missile proliferation as related phenomenon This work also focuses evenhandedly on both nonproliferation and defense policy including missile defenses and counterforce doctrines to fashion a set of integrated strategies for dealing with ballistic and cruise missile proliferation Signs of missile contagion abound In this study Gormley argues that a series of rapid and surprising developments since 2005 suggest that the proliferation of missiles capable of delivering either weapons of mass destruction or highly accurate conventional payloads is approaching a critical threshold The surprising fact is that land attack cruise missiles not ballistic missiles constitute the primary problem Flying under the radar both literally and figuratively land attack cruise missiles add a dangerous new dimension to protecting U S security interests and preventing regional military instability Gormley asserts that cruise missiles are not destined to supplant ballistic missiles rather they are likely to join them because when both are employed together they could severely test even the best missile defenses Worse yet Gormley argues land attack cruise missiles are increasingly being linked to preemptive strike doctrines which are fueling regional arms races and crisis instability This work explains why an epidemic of cruise missile proliferation long forecasted by analysts has only recently begun to occur After first assessing the state of ballistic missile proliferation Gormley explores the role of three factors in shaping the spread of cruise missiles These include specialized knowledge needed for missile development narrative messages about reasons for acquiring cruise missiles and norms of state behavior about missile nonproliferation policy and defense doctrine This book then addresses the policy adjustments needed to stanch the spread of

cruise missiles in the first place or barring that cope militarily with a more demanding missile threat consisting of both cruise and ballistic missiles *Faultlines*, 2007 Terrorism and internal security in India □□□□□□□□□□ □□□, 2023-08-21

Balancing Risks Jeffrey W. Taliaferro, 2019-06-30 Great powers often initiate risky military and diplomatic inventions in far off peripheral regions that pose no direct threat to them risking direct confrontation with rivals in strategically inconsequential places Why do powerful countries behave in a way that leads to entrapment in prolonged expensive and self defeating conflicts Jeffrey W Taliaferro suggests that such interventions are driven by the refusal of senior officials to accept losses in their state s relative power international status or prestige Instead of cutting their losses leaders often continue to invest blood and money in failed excursions into the periphery Their policies may seem to be driven by rational concerns about power and security but Taliaferro deems them to be at odds with the master explanation of political realism Taliaferro constructs a balance of risk theory of foreign policy that draws on defensive realism in international relations and prospect theory in psychology He illustrates the power of this new theory in several case narratives Germany s initiation and escalation of the 1905 and 1911 Moroccan crises the United States involvement in the Korean War in 1950 52 and Japan s entanglement in the second Sino Japanese war in 1937 40 and its decisions for war with the U S in 1940 41 *Compellence and the Strategic Culture of Imperial Japan* Forrest Morgan, 2003-11-30 Compellence is a fundamental tool of international security policy This study explains how culture shapes the ways that decision makers respond to the threat of force First Morgan builds a theoretical framework next he analyzes three cases in which states attempted to compel Japan to change its behavior The first is an in depth analysis of the 1895 triple intervention in which Russia Germany and France forced Japanese leaders to return the Liaotung Peninsula to China following the first Sino Japanese War The second and third relate to World War II the 1941 oil embargo intended to coerce Tokyo to withdraw its military from China and Washington s 1945 efforts to force Japan to end the war These cases explain much of the seemingly irrational behavior previously attributed to Japanese leaders Morgan demonstrates that culture clearly influenced outcomes in all three cases by conditioning Japanese perceptions strategic preferences and governmental processes These findings are relevant today and recent conflicts suggest that they will be increasingly important into the 21st century This book offers policy makers a much needed method for employing strategic culture analysis to develop more effective security strategies strategies that will be of vital importance in an increasingly volatile world **Annual report** Rand Corporation, 1996 **Управление будущим** Георгий Почепцов, 2019-10-16 2 0 **Uluslararası Güvenliğe Giriş** Ayça Eminoğlu, Murat Ülgül, Bezen Balamir Coşkun, Bülent Şener, Ceren Uysal Oğuz, Çiğdem Üstün, Gökhan Koçer, Kristin Vandenbelt, Mehmet Emin Erendor, Mete Ulaş Aksoy, Salih Biçakçı, Sanem Özer, Selim Kurt, Senem Atvur, Şeyma Kalyoncu, Vahit Güntay, *Selected Rand Abstracts* Rand Corporation, 2000 Includes publications previously listed in the supplements to the Index of selected publications of the Rand Corporation Oct 1962 Feb 1963 **Balance of Power** T. V. Paul, James J. Wirtz, Michel Fortmann, 2004 Since the sudden

disappearance of the Soviet Union many scholars have argued that the balance of power theory is losing its relevance This text examines this viewpoint as well as looking at systematic factors that may hinder or favour the return of balance of power politics
