**Comparative Immunology**, 2003      Comparative Immunobiology Margaret J. Manning, Rodney J. Turner, 1976

*Advances in Comparative Immunology* Edwin L. Cooper, 2018-08-07 Immunologists perhaps understandably most often concentrate on the human immune system an anthropocentric focus that has resulted in a dearth of information about the immune function of all other species within the animal kingdom However knowledge of animal immune function could help not only to better understand human immunology but perhaps more importantly it could help to treat and avoid the blights that affect animals which consequently affect humans Take for example the mass death of honeybees in recent years their demise resulting in much less pollination poses a serious threat to numerous crops and thus the food supply There is a similar disappearance of frogs internationally signaling ecological problems among them fungal infections This book aims to fill this void by describing and discussing what is known about non human immunology It covers various major animal phyla its chapters organized in a progression from the simplest unicellular organisms to the most complex vertebrates mammals Chapters are written by experts covering the latest findings and new research being conducted about each phylum Edwin L. Cooper is a Distinguished Professor in the Laboratory of Comparative Immunology Department of Neurobiology at UCLA s David Geffen School of Medicine      **Comparative Immunology** Edwin L. Cooper, 2014-03-28 In this new book Edwin Cooper surveys the field of comparative immunology a field that has undergone great growth over the last twenty years After an introduction to the immune response and its phylogeny phagocytosis and primordial cell mediated immunity are discussed followed by a number of chapters that cover transplantation immunity Humoral immunity is then discussed with chapters on invertebrates antibody synthesis and immunoglobulins The book finishes with accounts of immunomodulation and diseases of the immune system This book will be an invaluable guide and reference to immunologists and zoologists who are interested in the comparative aspects of the immune system      Comparative Immunology Edwin Lowell Cooper, 1976      *Immunology* R. J. Turner, 1994-08-08 This text is aimed at those students and research workers who have some knowledge of immunology but are curious about the advances opportunities and challenges in comparative work It answers questions about the similarities between different orders classes phyla and kingdoms      **Aspects of developmental and comparative immunology** John B. Solomon, Congress of Developmental and Comparative Immunology (1st : 1980 : Aberdeen, Scot.), International Society of Developmental and Comparative Immunology, 1981
