**Computer Aided Systems Theory - EUROCAST 2001** Roberto Moreno-Diaz,Bruno Buchberger,Jose-Luis Freire,2003-08-14 The concept of CAST as Computer Aided Systems Theory was introduced by F Pichler in the late 1980s to include those computer theoretical and practical developments as tools to solve problems in System Science It was considered as the third component the other two being CAD and CAM necessary to build the path from Computer and Systems Sciences to practical developments in Science and Engineering The University of Linz organized the first CAST workshop in April 1988 which demonstrated the acceptance of the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 89 This was a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years alternating between Las Palmas de Gran Canaria and a continental European location Thus successive EUROCAST meetings have taken place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 and Vienna 1999 in addition to an extra European CAST Conference in Ottawa in 1994

Electrical Generation and Distribution Systems and Power Quality Disturbances Gregorio Romero,Luisa Martinez,2011-11-21 The utilization of renewable energy sources such as wind energy or solar energy among others is currently of greater interest Nevertheless since their availability is arbitrary and unstable this can lead to frequency variation to grid instability and to a total or partial loss of load power supply being not appropriate sources to be directly connected to the main utility grid Additionally the presence of a static converter as output interface of the generating plants introduces voltage and current harmonics into the electrical system that negatively affect system power quality By integrating distributed power generation systems closed to the loads in the electric grid we can eliminate the need to transfer energy over long distances through the electric grid In this book the reader will be introduced to different power generation and

distribution systems with an analysis of some types of existing disturbances and a study of different industrial applications such as battery charges      **One Health, 2nd Edition** Jakob Zinsstag, Esther Schelling, Lisa Crump, Maxine Whittaker, Marcel Tanner, Craig Stephen, 2020-09-30 One Health the concept of combined veterinary and human health has now expanded beyond emerging infectious diseases and zoonoses to incorporate a wider suite of health issues Retaining its interdisciplinary focus which combines theory with practice this new edition illustrates the contribution of One Health collaborations to real world issues such as sanitation economics food security and vaccination programmes It includes more non infectious disease issues and climate change discussion alongside revised case studies and expanded methodology chapters to draw out implications for practice Promoting an action based solutions oriented approach One Health The Theory and Practice of Integrated Health Approaches highlights the lessons learned for both human and animal health professionals and students
