Kaufmann, 2013-05-31 Essay from the year 2011 in the subject English Language and Literature Studies Linguistics grade Distinction University of Newcastle upon Tyne EDUCATION COMMUNICATIONS AND LANGUAGE SCIENCES course Sociolinguistics language English abstract The massive increase of English speakers around the world who speak it at all different levels of proficiency for any variety of purposes and with other non native speakers has sparked some concerns and controversies Some are concerned that its wide spread and the emergence and institutionalisation of new Englishes will lead to a language fragmentation that could ultimately result in mutual unintelligibility The question of who holds authority over English today is causing heated discussions Teaching practices for English as a foreign language are yet another contentious

subject For the most part English teaching is still oriented towards British or North American varieties and a learner's proficiency is measured in relation to those norms Some however demand that English teaching practices take into account that usage situations and requirements for English have changed and that teachers prepare students for international communication rather than communication with Americans or British The issue with perhaps the greatest political significance is that of linguistic imperialism As English particularly the prestige varieties British and American are being taught to more and more people across the world some have voiced their concern that this compromises the cultural integrity of the non native speaker There is a fear that English might suppress or even replace local languages and be used as a tool to spread Anglo American cultural hegemony This essay gives first a rough overview over who speaks English in the world today It then briefly discusses some of the attempts by scholars to categorise this immense number of different people focusing particularly on Kachru's model of the spread of English It addresses some of the factors that lead to the emergence of new varieties of English describing Nigerian English and China English in more detail by way of an example Linguistic imperialism is discussed subsequently as one particularly controversial issue relating to the rise of English to one of the world's most predominant languages

Linguistic Ecology Peter Mühlhäusler, 2002-11-01 In this book the author examines the transformation of the Pacific language region under the impact of colonization westernization and modernization By focusing on the linguistic and socio historical changes of the past 200 years it aims to bring a new dimension to the study of Pacific linguistics which up until now has been dominated by questions of historical reconstruction and language typology In contrast to the traditional portrayal of linguistic change as a natural process the author focuses on the cultural and historical forces which drive language change Using the metaphor of language ecology to explain and describe the complex interplay between languages speakers and social practice the author looks at how language ecologies have functioned in the past to sustain language diversity and at what happens when those ecologies are disrupted Whilst most of the examples used in the book are taken from the Pacific and Australian region the insights derived from this area are shown to have global applications The text should be useful for linguists and all those interested in the large scale loss of human language

The Linguistic Web Pasquale De Marco, 2025-08-08 In a world where communication is key one language has emerged as the dominant force English From the boardrooms of multinational corporations to the bustling streets of global cities English has become the lingua franca of our interconnected world But how did English achieve this remarkable status and what are the implications of its dominance This book delves into the fascinating history and far reaching impact of English as a global language We explore the factors that have contributed to its rise from the legacy of British colonialism to the economic and cultural influence of the United States We also examine the consequences of English's dominance both positive and negative for individuals and societies around the world On the one hand English has facilitated unprecedented levels of communication and cooperation between people from different cultures

It has enabled the spread of knowledge and understanding and it has played a role in promoting democracy and human rights English has also become a powerful tool for economic development opening up new opportunities for businesses and individuals alike On the other hand the dominance of English has also led to the marginalization of other languages and cultures Indigenous languages in particular are facing extinction at an alarming rate as English encroaches on their traditional domains This loss of linguistic diversity represents a significant threat to cultural heritage and human knowledge Moreover the dominance of English creates challenges for people who do not speak the language They may face barriers to education employment and other opportunities This can lead to social and economic inequalities as well as a sense of alienation and exclusion This book explores these complex issues in depth drawing on a wide range of sources and perspectives It is essential reading for anyone who wants to understand the role of language in our globalized world If you like this book write a review

Socio Linguistics Beau Patterson & Ryan West, 2018-09-21 Sociolinguistics is the descriptive study of the effect of any and all aspects of society including cultural norms expectations and context on the way language is used and society's effect on language It differs from sociology of language which focuses on the effect of language on society

Sociolinguistics overlaps considerably with pragmatics. It is historically closely related to linguistic anthropology and the distinction between the two fields has been questioned. This book deals with the social life of language. The field ranges from micro analyses to broadly based policy and planning undertakings. As such this book draws from sociolinguistics, the sociology of language and psycholinguistics. The relationship between language and identity, whether of an individual or a group, is a strong thread linking all the topics covered in the book. For researchers and advanced students it gives access to the field's most pressing issues and debates as well as providing a platform for new initiatives in sociolinguistic research. **African**

Isaac Mhute, 2023-07-28. *Membering the Rhodesian Linguistic Agenda in Zimbabwe* reports on a study carried out in Zimbabwe to ascertain the degree and effect of honouring the colonial linguistic agenda. The book employs an interpretivist philosophy and qualitative research approach that relies on participatory observations, interviewing purposively sampled

informants and focus group discussions involving snowball sampled graduates It was inspired by the Critical Language Policy Theory that considers language choice a critical determinant factor in how communities are administered politically economically socioculturally and educationally It establishes that whereas linguistic imperialism meant to serve as the lifeblood of the Southern Rhodesian colonial machine the former coloniser ensured coloniality in Zimbabwe by presenting the English language as a sacred media in political economic sociocultural and educational settings forever The study establishes that the only way Zimbabwe and other such post colonies could find redemption is by eradicating the sacredness of former colonisers languages by adding value to all their languages and the indigenous knowledge systems associated with them It also demonstrates that the bigger the delay the more is irretrievably lost together with custodians of the languages This book will be informative for undergraduates postgraduates and researchers in linguistics communication sociology anthropology and history It may also serve well as a resource to government researchers politicians and other policymakers

Post-imperial English Joshua A. Fishman, Andrew W. Language Policy at the Supranational Level Huan Yik Lee, M. Obaidul Hamid, Ian Hardy, 2024-10-21 This book provides a critical examination of the English only policy of ASEAN the Association of the ten Southeast Asian nations It presents the ASEAN language policy and planning LPP journey through time rationalising English as the sole working language for ASEAN in the past followed by a critique of the status quo considering regional complexities and dynamics and finally exploring alternative linguistic futures for ASEAN and the Southeast Asian region The book also offers methodological innovations in LPP research by utilising the largely underrepresented and undervalued agency of people with expertise The authors argue for a multilingual commitment towards pursuing an agency of projectivity in co constructing imagined LPP possibilities to reflect the region's socio historical context socio political intricacies and socio linguistic diversity The way forward is a more inclusive equitable balanced and responsible approach to LPP both regionally and globally The book engages with both deconstructive and constructive paradigms offering promising proposals for dealing with key language issues and contemporary challenges This book will be interesting reading for language and education scholars sociolinguists historians political scientists policymakers diplomats language activists media personnel business leaders tourism players and other language policy and planning actors operating at national sub national and supra national levels
