Fernández, 1993-11-11

Today the notion of diglossia occupies a prominent place in sociolinguistic research. Since the 1960s when the dominant sense of diglossia was the complementary sociofunctional distribution of two varieties of the same language, the term has been applied often controversially to a growing number of diverse sociolinguistic situations. As a consequence of this extension of the scope of the concept in combination with an increasing interest in the relationship between the role of language and the social structure, the number of publications in this field has risen exponentially over the last decades. However, despite the growing importance of the notion up till now there was no adequate bibliography devoted to diglossia while coverage in other bibliographies does not do justice to the number of works actually published in this area. This first comprehensive bibliography of the subject includes almost 3 000 entries although the time span covered is 1960-1990; the book includes several dozens of entries from before 1960 and also a substantial number of very recent publications from the period 1990-1992. The selection of items has not been restricted to a specific definition of diglossia; all available publications in which the term or one of its offsprings appears have been included; moreover, when considered appropriate, some material relevant to the subject has been added even though the term is not explicitly used. The usefulness of the bibliography has been enhanced significantly by six indexes: 1 index of languages, 2 diglossia in literature, 3 historically oriented works, 4 pedagogically oriented works, 5 theoretical works and 6 theses and dissertations.

Imperative Clauses in Generative Grammar Wim van der Wurff, 2007-07-13. This volume contains ten articles exploring a wide range of issues in the analysis of the imperative clause from a generative perspective. The language data investigated in detail in the articles come from Dutch, English, German, old Scandinavian, Spanish and South Slavic; there is further significant discussion of data from other Germanic and Romance languages. The phenomena addressed in several cases in more than one article, leading to some lively debate about contentious issues, include the following: the nature and interpretation of imperative subjects, the properties of participial imperatives, clitic behavior, restrictions on topicalization, word order, null arguments, negative imperatives and imperatives in embedded clauses. The volume has a substantial introduction sketching the results of earlier generative work on the topic, most of it scattered across disparate outlets; the issues left open by this earlier work and the contribution to further insight and understanding made by the book's articles.

Perspectives on Arabic Linguistics XVII-XVIII Mohammad T. Alhawary, Elabbas Benmamoun, 2005-01-01. The papers in this volume are a selection from papers presented at the Annual Symposia on Arabic Linguistics held in 2003, Alexandria and 2004, Oklahoma. They tackle a broad range of issues in current linguistic research, particularly in the areas of phonology, morphology, lexicon, sociolinguistics and L1 and L2 acquisition. They are distinguished for the depth of coverage and the types of data considered.

The Transformative Materiality of Meaning-Making David Parkin, 2021-08-18 This book explores verbal and non verbal communication from a social anthropological viewpoint drawing on ethnographic data from fieldwork in East Africa It gives an overview of developments since the 1960s in the anthropology of language use and how these have influenced the author's thinking The volume makes the argument that language and other forms of communication involve semiotic transactions between interlocutors that such communicative exchanges do more than convey information and that they give identity to the recipients of such transactions who reciprocate by defining speakers The density and situational totality of such semiotic exchange can moreover be regarded as a kind of materiality both in terms of their impact on social interaction and in how interlocutors interact bodily as well as verbally among themselves
