Index-catalogue of the Library of the Surgeon General's Office, United States ,1890 Text and Textuality in Early Medieval Iberia Graham Barrett,2023-06-20 Text and Textuality in Early Medieval Iberia is a study of the functions and conceptions of writing and reading documentation and archives and the role of literate authorities in the Christian kingdoms of the northern Iberian Peninsula between the Muslim conquest of 711 and the fall of the Islamic caliphate at Cordoba in 1031 Based on the first complete survey of the over 4 000 surviving Latin charters from the period it is an essay in the archaeology and biography of text part one concerns materiality tracing the lifecycle of charters from initiation and composition to preservation and reuse while part two addresses connectivity delineating a network of texts through painstaking identification of more than 2 000 citations of other charters secular and canon law the Bible liturgy and monastic rules Few may have been able to read or write yet the extent of textuality was broad and deep in the authority conferred upon text and the arrangements made to use it Via charter and scribe society and social arrangements came increasingly to be influenced by norms originating from a network of texts By profiling the intersection and interaction of text with society and culture Graham Barrett reconstructs textuality how the authority of the written and the structures to access it framed and constrained actions and cultural norms and proposes a new model of early medieval reading As they cited other texts charters circulated fragments of those texts we must rethink the relationship of sources and audiences to reflect fragmentary transmission in a textuality of imperfect knowledge Archaeoastronomy and the Maya Gerardo Aldana y Villalobos,Edwin

L. Barnhart, 2014-05-30 Archaeoastronomy and the Maya illustrates archaeoastronomical approaches to ancient Mayan cultural production. The book is contextualized through a history of archaeoastronomical investigations into Mayan sites originating in the 19th century discovery of astronomical tables within hieroglyphic books. Early 20th century archaeological excavations revealed inscriptions carved into stone that also preserved astronomical records along with architecture that was built to reflect astronomical orientations. These materials provided the basis of a growing professionalized archaeoastronomy blossoming in the 1970s and expanding into recent years. The chapters here exemplify the advances made in the field during the early 21st century as well as the on going diversity of approaches presenting new perspectives and discoveries in ancient Mayan astronomy that result from recent studies of architectural alignments, codices, epigraphy, iconography, ethnography, and calendrics. More than just investigations of esoteric ancient sciences, studies of ancient Mayan astronomy have profoundly aided our understanding of Mayan worldviews. Concepts of time and space, meanings encoded in religious art, intentions underlying architectural alignments, and even methods of political legitimization are all illuminated through the study of Mayan astronomy.
