Linked National Models: A Tool For International Food Policy Analysis Günther Fischer, Klaus Froberg, Michiel A. Keyzer, Kirit S. Parikh, 1988-08-31 **Econometric Models of Asian Link** Shinichi Ichimura, Mitsuo Ezaki, 2012-12-06 This is the first outcome of our effort in ASIAN LINK PROJECT to construct the econometric models of Asian developing countries and analyze their inter dependence with major trading partners the United States and Japan The model we present here is called Asian Link System The countries in this system include Korea Taiwan Hong Kong China the Philippines Thailand Malaysia Singapore Indonesia Japan and the United States They are covered by national models The rest of the world is divided into several regions and treated by simple proto type models The main characteristics of Asian Link System are to deal with the inter dependent relations between Asian developing countries on the one hand and Japan and United States on the other hand Here are presented these national models and the Asian Link System with the underlying statistical data so that any econometrician can re estimate our models and check the results of our research work Nowadays most articles and books in econometrics report only the final results or conclusions of research so that no other econometrician can re calculate or re examine the findings This is very serious in the empirical research because as theorists may make mistakes positive economists do commit errors or miss some possible considerations Unless statistical data are offered other econometricians cannot make suggestions or improve the models This is the main reason why empirical research in econometrics or applied econometrics are not making substantial progress in recent years Econometric Models of Asian-Pacific Countries Shinichi Ichimura, Yasumi Matsumoto, 2012-12-06 This book is a sequel to our first report of ASIAN LINK PROJECT in 1985 Econometric Models of Asian LINK Springer Verlag Tokyo Berlin New York Now the scope is expanded to Asian Pacific Countries in coverage so that this monograph presents the econometric models of Japan the United States Canada China Korea Taiwan Hong Kong Thailand the Philippines Malaysia Singapore Indonesia Australia and the European Community We are particularly happy to have included the excellent models of Australia and Canada whose economies are essential parts of the Asian Pacific Economic Community Most of those models were presented at the Workshop of Asian Link Project held in Bandung Indonesia at the time of the Second Convention of the East Asian Economic Association 1990 Those models have been up dated since then and several other important models were added Unlike our previous book we have not tried here to link these national models as a regional or global model in any way except for the model by S Kinoshita which offers a regional linkage for Pacific basin economies by linking the US Japan Canada the European Community countries as a group Asian NIEs Korea Hong Kong Taiwan ASEAN Indonesia Malaysia the Philippines Singapore and East Asian economies As we argued in our previous publication we tried to publish these econometric models again with the statistical data as much as we could so as to enable the reader examine the estimation and performance of the models by himself *Linking Models and Experiments, Volume 2* Tom Proulx, 2025-08-07 Linking Models and Experiments
