**and in the Right Place** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Residence Rules in the Decennial Census, 2006-12-16 The usefulness of the U S decennial census depends critically on the accuracy with which individual people are counted in specific housing units at precise geographic locations The 2000 and other recent censuses have relied on a set of residence rules to craft instructions on the census questionnaire in order to guide respondents to identify their correct usual residence Determining the proper place to count such groups as college students prisoners and military personnel has always been complicated and controversial major societal trends such as placement of children in shared custody arrangements and the prevalence of snowbird and sunbird populations who regularly move to favorable climates further make it difficult to specify ties to one household and one place Once Only Once and in the Right Place reviews the evolution of current residence rules and the way residence concepts are presented to respondents It proposes major changes to the basic approach of collecting residence information and suggests a program of research to improve the 2010 and future censuses
