Sala Mayato, Inigo Egusquiza, 2007-11-30 The treatment of time in quantum mechanics is still an important and challenging open question in the foundation of the quantum theory This multi authored book written as an introductory guide for newcomers to the subject as well as a useful source of information for the expert covers many of the open questions The book describes the problems and the attempts and achievements in defining formalizing and measuring different time quantities in quantum theory **Petroleum Times**, 1926 *Some Experiments in Connexion with the Injection and Combustion of Fuel-oil in Diesel Engines* Charles John Hawkes, 1921 *An Experiment with Time* John W. Dunne, 1969 **Time in Quantum Mechanics** J.G. Muga, R. Sala Mayato, I.L. Egusquiza, 2003-07-01 Time and quantum mechanics have each of them separately captivated scientists and laymen alike as shown by the abundance of popular publications on time or on the many quantum mysteries or paradoxes We too have been seduced by these two topics and in particular by their combination Indeed the treatment of time in quantum mechanics is one of the important and challenging open questions in the foundations of quantum theory This book describes the problems and the attempts and achievements in defining formalizing and measuring different time quantities in quantum theory such as the parametric clock time tunneling times decay times dwell times delay times arrival times or jump times The theoretical analysis of several of these quantities has been controversial and is still subject to debate For example there are literally hundreds of research papers on the tunneling time In fact the standard recipe to link the observables and the formalism does not seem to apply at least in an obvious manner to time observables This has posed the challenge of extending the domain of ordinary quantum mechanics *Quarterly Journal of the Chemical Society of London* Chemical Society (Great Britain), 1877 **Technical Report**, 2003 *An Introduction to Physical Science* Ivor Blashka Hart, 1925 **Improvability; Its Intercorrelations and Its Relations to Initial Ability** Henrietta Viola Race, 1922 *Studies from the Rockefeller Institute for Medical Research* Rockefeller Institute for Medical Research, 1915 **Annals of Surgery**, 1905 Includes the transactions of the American Surgical Association New York Surgical Society Philadelphia Academy of Surgery Southern Surgical Association Central Surgical Association and at various times of other similar organizations **Reference Earth Orbital Research and**
