Carley, 2000 Experimental Robotics Oussama Khatib, Vijay Kumar, Daniela Rus, 2008-02-26 The International Symposium on Experimental Robotics ISER is a series of bi annual meetings which are organized in a rotating fashion around North America Europe and Asia Oceania The goal of ISER is to provide a forum for research in robotics that focuses on the novelty of theoretical contributions validated by experimental results This unique reference presents the latest advances in robotics with ideas that are College of Engineering University of Michigan. College of conceived conceptually and have been explored experimentally Making the Implicit Explicit Barbara E. Lovitts, 2023-07-03 Despite their and other stakeholders Engineering, 1983 consistent demand for excellence doctoral programs have rarely if ever been assessed in terms of the quality of the dissertations departments produce Yet dissertations provide the most powerful objective measure of the success of a department's doctoral program Indeed assessment when done properly can help departments achieve excellence by providing insight into a program s strengths and weaknesses This book and the groundbreaking study on which it is based is about making explicit to doctoral students the tacit rules for the assessment of the final of all final educational products the dissertation The purpose of defining performance expectations is to make them more transparent to graduate students while they are in the researching and writing phases and thus to help them achieve to higher levels of accomplishment Lovitts proposes the use of rubrics to clarify performance expectations not to rate dissertations or individual components of dissertations to provide a summary score but to facilitate formative assessment to support not substitute for the advising process She provides the results of a study in which over 270 faculty from ten major disciplines spanning the sciences social sciences and humanities were asked to make explicit their implicit standards or criteria for evaluating dissertations The book concludes with a summary of the practical and research implications for different stakeholders faculty departments universities disciplinary associations accrediting organizations and doctoral students themselves The methods described can easily be adapted for the formative assessment of capstone courses senior and master s theses comprehensive exams papers and journal articles Logic Based Program Synthesis and Transformation Patricia M. Strongly Coupled Coulomb Systems Gabor J. Kalman, J. Martin Rommel, Krastan Blagoev, 2006-03-11 The International Conference on Strongly Coupled Coulomb Systems was held on the campus of Boston College in Newton Massachusetts August 3 10 1997 Although this conference was the first under a new name it was the continuation of a series of international meetings on strongly coupled plasmas and other Coulomb systems that started with the NATO Summer Institute on Strongly Coupled Plasmas almost exactly twenty years prior to this conference in July of 1977 in Orleans la Source France Over the intervening period the field of strongly coupled plasmas has developed vigorously In the 1977 meeting the emphasis was on computer Monte Carlo and molecular dynamics simulations which provided for the first time insight into the rich and new physics of strongly coupled fully ionizedplasmas While theorists scrambled to provide a theoretical underpinning for these results there was also a dearth of real experimental input to reinforce the computer simulations Over the past few years this situation has changed drastically and a variety of direct experiments on classical pure strongly correlated plasma systems charged particle traps dusty plasmas electrons on the surface of liquid helium etc have become available Even more importantly entire new area of experimental interest in condensed matter physics have opened up through developments in nano technology and the fabrication of low dimensional systems where the physical behavior in many ways is similar to that in classical plasmas Strongly coupled plasma physics has always been an interdisciplinaryactivity
