harmonization process in the area of international trade law The International Business Lawyer first commented in 1987 that the book can only be described as a vade mecum for every international business lawyer an assessment that now seems more merited than ever

Insuring the Air Transport Industry Against Aviation War and Terrorism Risks and Allied Perils Yaw Otu Mankata Nyampong, 2012-12-22 This book explores the central problems underlying the insurance of aviation war and terrorism risks and associated perils It critically analyses the reasons why conventional insurance markets are unwilling or unable to provide sustainable insurance coverage for aviation war and terrorism risks in the aftermath of catastrophic events such as the terrorist events of September 11 2001 It also examines some of the prominent concepts proposed and or implemented after 9 11 to determine whether and to what extent these concepts avoid identified pitfalls Like many of life s essentials the importance of insurance is most evident when it is not available The sheer scale and magnitude of the insurance losses that followed 9 11 caused conventional insurance markets which hitherto had been offering generous insurance coverage for aviation war and terrorism risks to air transport operators for little or no premium to withdraw coverage forthwith The ensuing absence or insufficiency of commercial insurance coverage for aviation war and terrorism risks has sparked a global search for viable and sustainable alternatives Ten years have since elapsed and despite numerous efforts the fundamental problems remain unresolved The book proceeds on the premise that the underlying issues are not entirely legal in nature they have immense economic psychological and policy implications that cannot be underestimated A multidisciplinary approach is therefore used in examining the issues drawing heavily upon analytical principles adapted from law and economics and behavioural law and economics It is hoped that the resulting study will be beneficial not only to lawyers and those interested in aviation insurance but also to economists air transport insurance program managers capital market investors and governmental policymakers both at the national and international levels

Managing Aviation Projects from Concept to Completion Triant G. Flouris, Dennis Lock, 2016-02-22 Triant Flouris is a prominent academic and administrator in aviation management education Dennis Lock has more than forty years experience in practising lecturing and writing about project management When these two experts combined their considerable talents to

write their earlier book Aviation Project Management it was little wonder that distinguished reviewers gave generous praise and acclaimed it as a welcome addition to what until then had been a neglected field That first title was structured as an essential primer for managers and students The authors have now written this more in depth book for managers and students who need to study aviation project management in much greater detail as well as critically connect project management within an aviation context to prudent business decision making Aviation project management is described in considerable detail throughout all stages of a lifecycle that begins when the project is only a vague concept and does not end until the project has been successfully completed fully documented and put into operational service Aviation projects have commonly failed to deliver their expected outcomes on time and have greatly exceeded their intended budgets Many of those failures would have been prevented if the project managers had adhered to the sound principles of project management as described and demonstrated throughout this book
