Translating Human Inner Life In and Between the Arts Malgorzata Gamrat,2025-05-15 The book examines how so called human inner life feelings emotions sentiments and self reflection permeates different forms of art The methodological perspective is multidimensional covering translation studies and semiotics studies including semiotics of passion semiotics of culture existential semiotics and biosemiotics as well as different arts fields music literature film visual arts multimedia and video games The book combines these approaches and tools for each field in order to create a new approach that permits an examination of the process of translation in various arts connected to human inner life In this way the reader can see the complexity of human inner life from an interdisciplinary perspective *Edusemiotics - A Handbook* Inna

Semetsky,2016-10-17 Edusemiotics is a pioneering area of study that connects semiotics the science of signs with educational theory and the philosophy of education This volume reflects cutting edge research by scholars in education and in semiotics worldwide bridging the two discourses to present the state of the art in this new transdisciplinary field The book s emphasis is on educational theory as based on semiotic philosophy as such it challenges the current conception of semiotics in education as merely a sub branch of applied semiotics It presents edusemiotics as a novel unified conceptual framework at the interface of theoretical semiotics and educational philosophy based on both theoretical and empirical studies from around the world The chapters in this handbook also bring to the fore the intellectual legacy of Charles S Peirce John Dewey Gilles Deleuze Umberto Eco Julia Kristeva Mikhail Bakhtin Paul Ricoeur Martin Heidegger and other thinkers pointing out the implications of edusemiotics for meaningful pedagogy and experiential learning in diverse contexts [Semiotic Agency](#) Alexei Sharov,Morten Tønnessen,2022-02-08 This book invites readers to embark on a journey into the world of agency encompassing humans other organisms cells intracellular molecular agents colonies populations ecological systems and artificial autonomous systems We combine mechanistic and non mechanistic approaches in the analysis of the function and

evolution of organisms their subagents and multi organism systems and in this way offer a theoretical platform for integrating biosemiotics with both natural science and the humanities social sciences Agents are autonomous systems that incorporate knowledge on how to make sense of their environment and use it to achieve their goals The functions of all agents are supported by mechanisms at the lowest level however the explanatory power of mechanistic analysis is not sufficient for complex agents Non mechanistic methods rely on the goal directedness of agents whose dynamics follow self stabilized dynamic attractors The properties of attractors depend on stable or slowly changing factors and such dependencies can be interpreted as sign relations if they are adaptive in nature Agents can replace or redirect mechanisms on demand in order to preserve their functions for performing higher level semiotic functions mechanisms are thus only means We assume that mechanism and semiosis are not mutually exclusive and that simple agents can interpret signs mechanistically This assumption allows us to extend semiotic analysis to all agents including ribosomes in cells computers and robots This book challenges established traditions in natural science and the humanities social sciences semiotics no longer appears as restricted to humans and rational thinking and biology is no longer limited to rely exclusively on mechanistic reasoning

Semiotic Theory of Learning Andrew Stables, Winfried Nöth, Alin Olteanu, Sébastien Pesce, Eetu Pikkarainen, 2018-05-15 Semiotic Theory of Learning asks what learning is and what brings it about challenging the hegemony of psychological and sociological constructions of learning in order to develop a burgeoning literature in semiotics as an educational foundation Drawing on theoretical research and its application in empirical studies the book attempts to avoid the problematization of the distinction between theory and practice in semiotics It covers topics such as signs significance and semiosis the ontology of learning the limits of learning ecosemiotics ecology and sexuality The book is written by five of the key figures in the semiotics field each committed to the belief that living is a process of interaction through acts of signification with a signifying environment While the authors are agreed on the value of semiotic frameworks the book aims not to present an entirely coherent line in every respect but rather to reflect ongoing scholarship and debates in the area In light of this the book offers a range of possible interpretations of major semiotic theorists unsettling assumptions while offering a fresh and still developing series of perspectives on learning from academics grounded in semiotics *Semiotic Theory of Learning* is a timely and valuable text that will be of great interest to academics researchers and postgraduates working in the fields of educational studies semiotics psychology philosophy applied linguistics and media studies
