Chapter 3 Study Guide

Intro. to Criminological Theory

THEORY- is an assumption (or set of assumptions) that attempts to explain why or how things are related to each other

CRIMINOLOGICAL THEORY- the explanation of criminal behavior, as well as the behavior of police, attorneys, prosecutors, judges, correctional personnel, victims, and other actors in the criminal justice process

Classical Theory

CLASSICAL THEORY- a product of the Enlightenment period, or the Age of Reason, based on the assumption that people exercise free will and are thus completely responsible for their actions. Human behavior is motivated by a *hedonistic rationality* in which a person weighs the potential pleasure of an action vs. the possible pain associated with it.

- Enlightenment thinkers rejected the belief that nature or behavior was divinely ordained or predetermined
- Believed people exercised *free will* (the ability to choose any course of action) for which they were completely responsible
- Concerned with protecting human rights against corruption of legal institutions & excessive/horrible punishment (150-200 offenses in 18th Century carried death penalty)
- Crimes poorly defined, torture was routine, little consistency in application of law or punishments

Cesare Beccaria: best known classical criminologist; opposed death penalty; in 1794 his revolutionary book led to establishment of a more humane criminal law system & procedure.

Believed only legit. purpose of punishment is deterrence: special & general.

SPECIAL OR SPECIFIC DETERRENCE – prevention of the punished persons from committing crime again

GENERAL DETERRENCE- use of punishment of specific individuals to prevent people in general or society at large from engaging in crime

UTILITY- The principle that a policy should provide “the greatest happiness shared by the greatest number.”

The Politics of the Internet R.J. Maratea,2013-12-18 In The Politics of the Internet Political Claims making in Cyberspace and Its Effect on Modern Political Activism R J Maratea examines the Internet s effect on political claims making and protest action to show how online technology is helping to shape popular opinion about political issues The Internet hosts a vast collection of interconnected public cyber arenas where political claims are continuously disseminated to audiences and social reality is in a perpetual state of negotiation Unlike more static forms of print and television communication cyber arenas can be expanded to carry a nearly infinite amount of claims in a variety of multimedia formats which can be rapidly disseminated to global audiences for relatively little cost The corresponding rise of citizen journalism and emergent forms of cyber activism seemingly reflect how the Internet is revolutionizing the ways claimants attract audiences acquire resources and mobilize support as well as the ways that mainstream journalists report on matters of political importance Maratea suggests that the Internet has not fundamentally changed how political activists attain cultural relevance The press still largely determines what issues and activists are recognized by the public and historically powerful claims making groups such as corporate lobbyists are best positioned to succeed in a supposedly democratized new media world The analysis offered in The Politics of the Internet will be of particular value to students and scholars of sociology communications and political science

timely new contribution David Lyon argues that such IDs represent a fresh phase in the long term attempts of modern states to find stable ways of identifying citizens New ID systems are new because they are high tech But their newness is also seen crucially in the ways that they contribute to new means of governance The rise of e Government and global mobility along with the aftermath of 9 11 and fears of identity theft are propelling the trend towards new ID systems This is further lubricated by high technology companies seeking lucrative procurements giving stakes in identification practices to agencies additional to nation states particularly technical and commercial ones While the claims made for new IDs focus on security efficiency and convenience each proposal is also controversial Fears of privacy loss limits to liberty government control and even of totalitarian tendencies are expressed by critics This book takes an historical comparative and sociological look at citizen identification and new ID cards in particular It concludes that their widespread use is both likely and without some strong safeguards troublesome though not necessarily for the reasons most popularly proposed Arguing that new IDs demand new approaches to identification practices given their potential for undermining trust and contributing to social exclusion David Lyon provides the clearest overview of this topical area to date
