Introduction to Climate Change Management John C. Shideler,Jean Hetzel,2022-11-19 This book provides climate students with the basic scientific background to climate change management Students will learn about international and national approaches to climate change management defined in voluntary initiatives as well as in national law and international agreements The book describes mitigation and adaptation measures monitoring and reporting of greenhouse gas emissions and strategies for achieving a low carbon economy including green finance This book combines theory and practice introducing students to the conceptual background but also taking a professional and technical approach with case studies and low carbon toolkits Filled with didactic elements such as concept schemes tables charts figures examples as well as questions and answers at the end of the chapters this book aims to engage critical thinking and the discussion of important topics of our days The low carbon strategy is one of the answers to limiting the greenhouse effect on our planet This strategy is to minimize the overall carbon consumption in the life cycle of the products we consume from the extraction of raw materials to the end of their life The future is being built today This book will guide its readers along the path of imagining and realizing a low carbon economy

An Introduction to Climate Change Economics and Policy

Felix R. FitzRoy,Elissaios Papyrakis,2016-04-14 The 2nd edition of An Introduction to Climate Change Economics and Policy explains the key scientific economic and policy issues related to climate change in a completely up to date introduction for anyone interested and students at all levels in various related courses including environmental economics international development geography politics and international relations FitzRoy and Papyrakis highlight how economists and policymakers often

misunderstand the science of climate change underestimate the growing threat to future civilization and survival and exaggerate the costs of radical measures needed to stabilize the climate In contrast they show how direct and indirect costs of fossil fuels particularly the huge health costs of local pollution actually exceed the investment needed for transition to an almost zero carbon economy in two or three decades using available technology [Our Changing Climate](#) Chad
