Pearce,2025-05-22 What accounts for the variety of music witnessed across the world The answer lies in the psychological mechanisms of cultural evolution that combine a creative process of composing ever new forms of music and a perceptual process of learning to appreciate listening to them This book develops and tests a theory of the psychological mechanisms that enable listeners to learn the structure of their culturally situated musical environments so as to be able to perceive and appreciate music The central hypothesis is that music perception depends critically on mechanisms of statistical learning and probabilistic prediction These mechanisms are implemented in a computational model whose behaviour is analysed in detail

through simulations of psychological experiments The results demonstrate that the model can account for predictions generated by listeners for the pitch timing and harmonies of music While prediction is an important psychological mechanism in and of itself the evidence presented shows how it also lays the foundation for a broader account of music perception encompassing memory auditory scene analysis similarity perception complexity perception affect and aesthetic experience The proposed theory makes concrete predictions for differences in perception between listeners from different cultures and the developmental trajectories that result in these differences These predictions are tested and corroborated with respect to both the incidental cultural experience of non musicians and the formal cultural training of musicians Because the approach rests fundamentally on mechanisms of statistical learning it generalises naturally to other cultural domains including natural language visual media and dance

The city trip guide for Saint-Nazaire (France) YouGuide Ltd, Undertones of Insurrection Marc Weiner,2017-09-29 A basic tenet of literary studies is that aesthetic structures are politically significant because they represent an artist s response to the political implications of cultural codes with which the recipient of the modern work is also acquainted This tenet provides the basis for the ideological associations attending the appearance of music in the modern German narrative With his understanding of the arts as involved in often unacknowledged ideological forces within a culture Marc Weiner s Undertones of Insurrection bridges the gap between the New Musicology s rewarding infusion of modern cultural and literary theory into the study of music politically insightful examinations of narrative structures in the modern novel and the methodologically conservative area of musical literary relations in Germanic Studies In other words the questions it raises are different from those pursued in most examinations of music and literature because previous works of this kind concerning the literature of German speaking Europe have often disregarded social concerns in general and political issues in particular Ranging from 1900 to Doctor Faustus 1947 Weiner study sets the stage by examining public debates that conflated such issues as national identity racism populism the role of the sexes and xenophobia with musical texts In the literary analyses that follow Weiner discusses both obvious connections between music and sociopolitical issues Hesse s equation of jazz and insurrection in Steppenwolf and covert ones the suppression of music in Death in Venice and the use of politically charged musical subtexts in Werfel s Verdi and Schnitzler s Rhapsody By uncovering the ideological agendas informing cultural practice in modernist Germany Undertones of Insurrection calls for a reevaluation of the function of music in the modern German narrative
