James Coleman:

James Coleman George Baker, 2003-10-10 Illustrated critical essays on the work of artist James Coleman James Coleman has emerged in recent years as one of the most important artists of visual postmodernism His work has transformed critical debates about the status of the image in contemporary culture and influenced an entire generation of younger artists in ways that have not yet been fully acknowledged Until recently Coleman has enjoyed relatively little critical attention in part because of his refusal to comment on his projects or to allow his work to be reconstructed outside of the context of its exhibition The illustrated essays in this book span the entirety of Coleman's career to date from his early postminimal and conceptual experiments with memory and perception through his work in film video and narrative in the 1980s to his current ongoing series of slide projections with voice over that he calls simply projected images Reflecting the interdisciplinary nature of the debates induced by Coleman's work the essays discuss issues of subjectivity and identity nationalism postcolonialism memory spectacle culture digitalization and new media The contributors are Raymond Bellour Benjamin Buchloh Lynne Cooke Jean Fisher Luke Gibbons Rosalind Krauss Anne Rorimer and Kaja Silverman Written by curators critics and scholars and spanning the fields of art history literary criticism philosophy and film theory the essays attest to the interdisciplinary challenge of Coleman's work

English Patents of Inventions, Specifications ,1866 **House documents** ,1884 **Register of Retired Commissioned and Warrant Officers, Regular and Reserve, of the United States Navy** ,1990 **Lazarsfeld's Methodology and Its Influence on Postwar Sociology in Europe** Hynek Jeřábek, 2024-11-28 This book explains how the Columbia model of sociology which was based on the methodology of P F Lazarsfeld became a dominant sociological school of thought in American and European postwar sociology Providing an overview of Lazarsfeld's inventions and his methodological organisational and institutional innovations it describes the means by which a particular model of sociology

was gradually adopted in departments headed by Lazarsfeld and in the work of his successors With attention to the use by Lazarsfeld of methodological texts published by prestigious publishing houses in his research and teaching his activity in international organisations including the UN his collaboration with figures such as Robert K Merton and Raymond Boudon and his attempts to show how the roots of his empirical research methodology lay in the work of early European scholars this volume shows how a particular sociological paradigm came to prevail over others for more than a decade It will therefore appeal to scholars of sociology with interests in the history of the discipline and questions of research methodology

Economics and Sociology Richard Swedberg, 2020-11-10 The boundary between economics and sociology is presently being redefined but how why and by whom Richard Swedberg answers these questions in this thought provoking book of conversations with well known economists and sociologists Among the economists interviewed are Gary Becker Amartya Sen Kenneth Arrow and Albert O Hirschman the sociologists include Daniel Bell Harrison White James Coleman and Mark Granovetter The picture that emerges is that economists and sociologists have paid little attention to each other during most of the twentieth century social problems have been analyzed as if they had no economic dimension and economic problems as if they had no social dimension Today however there is a dialogue between the two fields as economists take on social topics and as sociologists become interested in rational choice and new economic sociology The interviewees describe how they came to challenge the present separation between economics and sociology what they think of the various proposals to integrate the fields and how they envision the future The author summarizes the results of the conversations in the final chapter The individual interviews also serve as superb introductions to the work of these scholars

Historical Dictionary of School Segregation and Desegregation Jeffrey Raffel, 1998-10-15 Throughout the nation s history from before the Civil War through Reconstruction across the years of lynchings and segregation to the Brown v Board of Education decision and the battles over busing no issue has divided the American people more than race and at the heart of the race issue has been the conflict over school segregation and desegregation Prior to the Civil War South Carolina enacted the first compulsory illiteracy law which made it a crime to teach slaves to write and other Southern states soon followed South Carolina s example After the Civil War schools for blacks were founded throughout the South including many Historically Black Colleges and Universities The 1896 Plessy v Ferguson Supreme Court decision established the principle of separate but equal education which led to decades of segregation With the 1954 Brown decision the Supreme Court overturned the separate but equal principle and the Civil Rights Act of 1964 empowered the federal government to affect school desegregation The process of desegregation continues to this day with much debate and mixed results Through more than 260 alphabetically arranged entries this comprehensive reference book describes persons court decisions terms and concepts legislation reports and books types of plans and organizations central to the struggle for educational equality The volume covers topics ranging from emotionally laden terms such as busing to complex legal concepts such as de facto and de jure segregation Each entry

includes factual information a summary of different viewpoints and a brief bibliography The book includes an introduction which outlines the history of school segregation and desegregation along with a chronology and extensive bibliographic material Thus this reference is a complete guide to school segregation and desegregation in elementary secondary and higher education in the United States *Neo-Avantgarde and Culture Industry* Benjamin H. D. Buchloh, 2003-02-28 Eighteen essays written by Buchloh over the last twenty years each looking at a single artist within the framework of specific theoretical and historical questions Some critics view the postwar avant garde as the empty recycling of forms and strategies from the first two decades of the twentieth century Others view it more positively as a new articulation of the specific conditions of cultural production in the postwar period Benjamin Buchloh one of the most insightful art critics and theoreticians of recent decades argues for a dialectical approach to these positions This collection contains eighteen essays written by Buchloh over the last twenty years Each looks at a single artist within the framework of specific theoretical and historical questions The art movements covered include Nouveau Realisme in France Arman Yves Klein Jacques de la Villegle art in postwar Germany Joseph Beuys Sigmar Polke Gerhard Richter American Fluxus and pop art Robert Watts and Andy Warhol minimalism and postminimal art Michael Asher and Richard Serra and European and American conceptual art Daniel Buren Dan Graham Buchloh addresses some artists in terms of their oppositional approaches to language and painting for example Nancy Spero and Lawrence Weiner About others he asks more general questions concerning the development of models of institutional critique Hans Haacke and the theorization of the museum Marcel Broodthaers or he addresses the formation of historical memory in postconceptual art James Coleman One of the book's strengths is its systematic interconnected account of the key issues of American and European artistic practice during two decades of postwar art Another is Buchloh's method which integrates formalist and socio historical approaches specific to each subject
