James Hutton The Founder Of Modern Geology:

James Hutton, the Founder of Modern Geology Sir Edward Bailey, 1967 **James Hutton--the Founder of Modern Geology** Edward Battersby Bailey, 1966 *James Hutton*, 1971 James Hutton Donald B. McIntyre, Alan McKirdy, 1997 James Hutton's Theory of the Earth secured his place as the founder of modern geology. As a leading figure in the Scottish Enlightenment period, that remarkable period in the second half of the 18th century associated with philosopher David Hume, economist Adam Smith, and chemist Joseph Black, Hutton provided unequivocal evidence that the Earth was far older than generally believed. He saw the possibility of evolution not only of the physical world but also of living creatures. Eleven years before the birth of Darwin, Hutton saw natural selection as a beautiful contrivance for adapting animals and plants to their changing environments. Time has not been kind to James Hutton. He is not nearly as well known as the others from his era. Earth's Autobiography is an effort to place his work in historical perspective, recognizing his importance for the groundwork he uncovered. His scientific work is described here in its rich social and political context, much of it in his own words. This book is being published in Hutton's bicentennial year. *James Hutton, Founder of Modern Geology (1726-1797)* Sir Edward Battersby Bailey, 1950 James Hutton Jean Jones, 1984 **James Hutton, the founder of modern geology, 1726-97** Murray Macgregor, 1947 *James Hutton, the Founder of Modern Geology* Douglas Anthony Bassett, 1970

James Hutton, the Founder of Modern Geology Edward Battersby Bailey, 1967 James Hutton, the Founder of Modern Geology Edward Battersby Bailey, 1967 **James Hutton** Cliff Porteous, Mike Brown, 2018 James Hutton and the History of Geology Dennis Dean, 2019-06-07 In *James Hutton and the History of Geology* Dennis R. Dean provides a more accurate and complete account of Hutton's major geological writings than any that has hitherto appeared. He examines the growth and development of Hutton's thought in the light of his training and experience in medicine, agriculture, and philosophy, locating him within the intellectual milieu of Edinburgh at the height of the Scottish Enlightenment. **James Hutton and the History of Geology** Dennis R. Dean, 1992 Though the publication of Hutton's Theory of the Earth, 1795, is usually regarded as the beginning of modern geology, it and other works by Hutton have rarely been studied in the original. Dean provides an accurate account of Hutton's major geological writings in the light of his training and experience. **James Hutton, Founder of Modern Geology (1726-1797)** E. B. Bailey, J. Hutton, *Theory of the Earth* James Hutton, 2016-07-13 This ebook is comprised of Hutton's 1788 paper Theory of the Earth, read before the Royal Society of Edinburgh, as well as Volumes 1 and 2 of his book of the same name. Although his books filled with long quotes in French make difficult reading, Hutton deserves to be better known as one of the makers of the modern view of the Earth. James Hutton Cliff Porteous, Mike Brown, 2006*

James Hutton Gordon Younger Craig, John Hewett Hull, 1999 The collection of papers in this volume commemorates the bicentenary of the death of James Hutton, the founder of modern geology. Eminent Earth scientists and science historians

celebrate his unique contribution to the knowledge of our planet's history and his influence on modern geological thinking

The Man Who Found Time Jack Repcheck, 2010-02 There are four men whose life's work helped free science from the straitjacket of religion Three of the four Nicolaus Copernicus Galileo Galilei and Charles Darwin are widely heralded for their breakthroughs The fourth James Hutton is comparatively unknown A Scottish gentleman farmer Hutton's observations on his small tract of land led him to a theory that directly contradicted biblical claims that the Earth was only 6 000 years old Telling the story not only of Hutton but of the rich intellectual milieu of the Scottish Enlightenment which brought together some of the greatest thinkers of the age from David Hume and Adam Smith to James Watt and Erasmus Darwin The Man Who Found Time is an enlightening engaging narrative about a little known man and the science he established James Hutton 1726-1797 S.
