The Revealing Image Joy Schaverien, 2021-11-18 Schaverien painstakingly describes and defines processes which have so far only been intuitively known to art therapists p6 by introducing and elaborating the psychoanalytical concepts of transference and countertransference in relation to the use of visual art objects The authors stated intention in this book is to attempt to bridge the perceived gap between the practice of art therapy and analytical forms of psychotherapy p 229 The epistemological base of this venture includes the fields of philosophy anthropology and aesthetics as well as psychoanalysis Schaverien suggests that analytical art psychotherapy is a way of working analytically with patients who are unsuitable or unready for psychotherapy giving examples of psychotic and borderline patients children and patients in psychiatric settings This is primarily a book about an analytical approach within art therapy which may be of interest in itself The material also raises issues of interest to analysts and psychotherapists whether or not they work with art in the clinical setting The book clarifies areas of similarity between the disciplines and also makes areas of difference apparent For example most analysts would agree that visual art like dream material and other non verbal representations of the inner world can at times articulate and communicate meanings which for one reason or another cannot be verbally articulated at the time and that this can be pertinent to the aim of analysis However I think few analysts would include facilities in their consulting rooms for the kind of art processes described in the book When the analyst is working with materials in this form the book will be extremely helpful in sorting out the complexity of the transference situation and the role of interpretation The book is so strongly grounded in experiences emerging in the presence of actual art processes and objects that I think it will be of most interest to those who are interested in the specific clinical issues involved in relating to the making and use of actual art objects within the setting Schaverien not only describes the processes involved in detail but also presents technical approaches to the making and handling of art objects within the setting which will inform the capacity of those who are not trained as art therapists to relate to this kind of material in the consulting room **The Embodied Image** Juhani

Pallasmaa, 2011-05-16 *The Embodied Image* The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book

is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind
