civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one of the world's oldest civilizations and is regarded as one of the cradles of civilization The Zhou dynasty 1046-256 BC supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period These states became independent and warred with one another in the following Warring States period Much of traditional Chinese culture literature and philosophy first developed during those troubled times In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin marking the beginning of imperial China However the oppressive government fell soon after his death and was supplanted by the longer lived Han dynasty 206 BC-220 AD Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly In the 21 centuries from 206 BC until AD 1912 routine administrative tasks were handled by a special elite of scholar officials Young men well versed in calligraphy history literature and philosophy were carefully selected through difficult government examinations China's last dynasty was the Qing 1644-1912 which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949 Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood the most recent being the Chinese Civil War 1927-1949 China was occasionally dominated by steppe peoples most of whom were eventually assimilated into the Han Chinese culture and population Between eras of multiple kingdoms and warlordism Chinese dynasties have ruled parts or all of China in some eras control stretched as far as Xinjiang and Tibet as at present Traditional culture and influences from other parts of Asia and the Western world carried by waves of immigration cultural assimilation expansion and foreign contact form the basis of the modern culture of China

Technology, Gender and History in Imperial China Francesca

Bray, 2013-06-19 What can the history of technology contribute to our understanding of late imperial China Most stories about technology in pre modern China follow a well worn plot in about 1400 after an early ferment of creativity that made it the most technologically sophisticated civilisation in the world China entered an era of technical lethargy and decline But how are we to reconcile this tale which portrays China in the Ming and Qing dynasties as a dying giant that had outgrown its own strength with the wealth of counterevidence affirming that the country remained rich vigorous and powerful at least until the end of the eighteenth century Does this seeming contradiction mean that the stagnation story is simply wrong or perhaps that technology was irrelevant to how imperial society worked Or does it imply that historians of technology should ask better questions about what technology was what it did and what it meant in pre modern societies like late imperial China In this book Francesca Bray explores subjects such as technology and ethics technology and gendered subjectivities both female and male and technology and statecraft to illuminate how material settings and practices shaped topographies of everyday experience and ideologies of government techniques of the self and technologies of the subject Examining technologies ranging from ploughing and weaving to drawing pictures building a house prescribing medicine or composing a text this book offers a rich insight into the interplay between the micro and macro politics of everyday life and the workings of governmentality in late imperial China showing that gender principles were woven into the very fabric of empire from cosmology and ideologies of rule to the material foundations of the state and the everyday practices of the domestic sphere This authoritative text will be welcomed by students and scholars of Chinese history as well as those working on global history and the histories of gender technology and agriculture Furthermore it will be of great use to those interested in social and cultural anthropology and material culture
