### **Elusive Quest For European Security From Edc To Cfsp:**

The Elusive Quest for European Security S. Duke, 1999-10-28 The Elusive Quest for European Security provides a detailed overview of the various attempts to incorporate a security and defence role in the European integration process. Consideration is given to why these aspects of the integration process have proven so elusive and what progress has been made towards this goal. The assessment includes topics such as the enlargement of NATO, the EU's Amsterdam Treaty and the role of the revived Western European Union as well as the role of the main actors which includes Britain's bid for European leadership in defence and the changing attitudes of administrations in Washington DC. European Security Culture Dr Monica Gariup, 2013-03-28 Grounded on tenets of cultural realism and social constructivism Monica Gariup develops a theoretical framework to enhance our understanding of security culture at the European Union level. She employs tools from political theory, linguistic analysis and international relations theory to examine the implications of discourse and practice in European Security and Defense Policy (ESDP). Innovative in scope, the volume analyzes whether elaborating a structurationist solution and proposing a discursive syntax of security makes it possible to identify and compare different types of security actors. Providing a comprehensive and objective analysis on the links and implications between the discourse and actual policy of the ESDP, this is essential reading for scholars and researchers in European politics, international relations, security and cultural studies. Globalization and National Security Jonathan Kirshner, 2013-01-11 In this book, top scholars of international relations assess the consequences of globalization for national security, identifying three distinct processes of globalization: the intensification of economic exchange, the flow of information and marketization, the expansion of the set of social relations governed by market forces, exploring how they can affect the capacity and power of states as well as conflict within and among them. Though much has been written on the topics of globalization and national security, there has been relatively little in the way of a systematic examination of the impact that globalization has on a state's national security. These essays deal with how stateless actors such as terrorists utilize the benefits of globalization, changing the nature of the security game. Failure to account for the influence of globalization will make it increasingly difficult to understand changes in the balance of power, prospects for war and strategic choices embraced by states.

**Eurafrica** Peo Hansen, Stefan Jonsson, 2014-10-23 In order to think theoretically about our global age, it is important to understand how the global has been conceived historically. Eurafrika was an intellectual endeavor and political project that from the 1920s saw Europe's future survival, its continued role in history as completely bound up with Europe's successful merger with Africa. In its time, the concept of Eurafrika was tremendously influential in the process of European integration. Today, the project is largely forgotten, yet the idea continues to influence EU policy towards its African partner. The book will recover a critical conception of the nexus between Europe and Africa, a relationship of significance across the humanities and social sciences. In assessing this historical concept, the authors shed light on the process of European integration. African

decolonization and the current conflictual relationship between Europe and Africa      **European Public Diplomacy** Mai'a K. Davis Cross, Jan Melissen, 2015-12-11 Do the various aspects of Europe's multi leveled public diplomacy form a coherent overall image or do they work against each other to some extent European Public Diplomacy pushes the literature on public diplomacy forward through a multifaceted exploration of the European case      British Power and International Relations During the 1950s Michael J. Turner, 2009-01-01 This is an integrated international history that pays special attention to Britain's role and status It contributes to the ongoing debate about Britain's decline as a great power and suggests that despite some retreats and compromises Britain managed successfully to maintain its influence and defend essential national interests      **EU Foreign Policy and Crisis Management Operations** Benjamin Pohl, 2014-03-21 This book explores the drivers of the EU's recent forays into peace and state building operations Since the Union's European now Common Security and Defence Policy ESDP CSDP became operational in 2003 the EU has conducted more than 20 civilian and military operations that broadly served to either deter aggression in host countries and or to build or strengthen the rule of law This sudden burst of EU activity in the realm of external security is interesting from both a scholarly and a policy perspective On one hand institutionalised cooperation in the field of foreign security and defence policy challenges the mainstream in IR theory which holds that in such sovereignty sensitive areas cooperation would necessarily be limited On the other hand the sheer quantity of operations suggests that the ESDP may represent a potentially significant feature of global governance In order to understand the drivers behind CSDP EU Foreign Policy and Crisis Management Operations analyses the policy output in this area including the operations conducted in the CSDP framework Up until now many studies inferred the logic behind CSDP from express intentions institutional developments and the potential of pooled capabilities By mining the rich data that CSDP operations represent in terms of the motives and ambitions of EU governments for the CSDP this book advances our understanding of the framework at large This book will be of much interest to students of European Security EU policy peacebuilding statebuilding and IR      *Regional Leadership in the Global System* Daniel Flesmes, 2016-04-08 We assume that the ideas interests and strategies of regional powers are highly significant variables with the power to influence foreign policy Yet while comparative research projects involving OECD countries are fairly common comparative research integrating developing regions is still rare despite the fact that these countries are among the key actors of the twenty first century This collection emphasizes the role of regional powers in intra regional interregional and global contexts analyzing the rise of regional powers from a comparative perspective In so doing the book explains how these powers have power to shape regional and global politics      **Interdisciplinary Studies in Turkey** Eyup Saritas, 2016-04-30 The information age facilitates life easier on the one hand and enables all to have access to any desired information in the shortest possible time Scientific studies that are products of great efforts keep pace with globalism to a substantial extent thanks to advanced technologies that shorten long distances As scientists we need to disregard negative impacts of globalism on all aspects of

life and endeavour to make use of its positive effects. Consequently as scientists that come up with good works after long and dedicated efforts we need to cut off ties with locality in modern information age. As it will be seen what is meant by locality is not scientists working on local issues but addressing to a group limited to one's own country only. For instance a scientific paper published in Turkey about a village or borough in Ankara might not easily exceed the narrow restriction of locality. Likewise publishing in Dutch a scientific work on a historical or social problem in the city of Leiden would be hardly possible to provide scientifically influential conclusions.

European Union Peacebuilding and Policing Michael Merlingen, Rasa Ostrauskaite, 2006-09-27. This new book provides an in-depth analysis of the projects of improvement carried out by the civilian peacebuilding missions in Bosnia and Macedonia drawing on the work of Michel Foucault to make the case that the EU's self-image as a model peacebuilder conceals another side of the European Security and Defence Policy. The authors explore the double-sided nature of peacebuilding missions on the one hand as a way to pacify, democratize, humanize and improve life in societies emerging from crisis or violence and on the other hand as a kind of political pastorate that limits the range of acceptable heterogeneity by refashioning, repositioning and reorganizing subjects in line with transcendentalized notions of good governance. The authors develop a limited reform agenda for how EU police missions can fold an agonistic generosity more deeply into their civilizing ethos in order to ensure they have a light expatriate footprint in their host countries. The prescriptive part of the book also discusses generic problems in the implementation of EU police reforms and suggests ways to overcome these challenges. This book will be of great interest to students of European politics, sociology, political science and theory.

*An Introduction to International Political Economy* Alison Watson, 2004-01-01. This book provides an overview of the dynamics of the contemporary global political economy with an emphasis on explaining these dynamics in both theoretical and practical terms. It opens with a chapter on exactly what the study of IPE entails, looking at the way in which politics and economics interact, the relationship between domestic and international factors and the role of the state. Watson goes on to outline the major theoretical approaches to IPE from the traditional theories including liberalism and Marxism to alternative theories including rational choice and new institutionalism. In Part Two she outlines the major policy issues characterizing IPE and in Part Three she looks at case studies to illustrate the theoretical points she has made. These include the world trade negotiations at Seattle, a description of the reasons for growth in regional integration arrangements such as the EU and a discussion of the impact of capital flight.

European Security in NATO's Shadow Stephanie C. Hofmann, 2013-01-03 NATO has been a successful forum for managing European security policy Yet European governments have repeatedly tried to build a new security institution in NATO's shadow In this innovative book Stephanie C Hofmann asks why governments attempted to create an additional institution despite no obvious functional necessity and why some attempts failed while others succeeded *European Security in NATO's Shadow* considers security cooperation through the lens of party ideologies to shed new light on these questions She observes that political parties are motivated to propose new institutions by their multidimensional ideologies Moreover the success of efforts to create such institutions depends on the degree of ideological congruence among parties in power In particular the relationship between the values of multilateralism sovereignty and Europe informed the impetus and success rate of the attempts made during negotiations for the Maastricht Amsterdam and Nice treaties to create a European security institution
