- What is a developmental state, according to Evans
  - What are its internal and external characteristics?
- What are the characteristics of a 'predatory' state?
- How can one transform a predatory state into a developmental state?
  - This is the key question in the institutions and governance approach to development

## **Embedded Autonomy:**

Embedded Autonomy Peter B. Evans, 2012-01-12 In recent years debate on the state's economic role has too often devolved into diatribes against intervention Peter Evans questions such simplistic views offering a new vision of why state involvement works in some cases and produces disasters in others To illustrate he looks at how state agencies local entrepreneurs and transnational corporations shaped the emergence of computer industries in Brazil India and Korea during the seventies and eighties Evans starts with the idea that states vary in the way they are organized and tied to society In some nations like Zaire the state is predatory ruthlessly extracting and providing nothing of value in return In others like Korea it is developmental promoting industrial transformation In still others like Brazil and India it is in between sometimes helping sometimes hindering Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work which demonstrates that successful state action requires an understanding of its own limits a realistic relationship to the global economy and the combination of coherent internal organization and close links to society that Evans called embedded autonomy

**Embedded Autonomy** Peter B. Evans, 1995-01-01 *Democratising Local Government*, 2002 Local government is at the forefront of development In South Africa the ambitious policy objectives of post apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people An entirely new system of developmental local government has thus been introduced As is the case in many developing countries the responsibilities of municipalities in South Africa have been extended dramatically often without adequate resources Managing municipalities for development therefore requires political will and strategic intervention The book provides a comprehensive introduction to developmental local government It includes the design of the new local government system and the issues posed by decentralisation an overview of specific challenges of urban and rural municipalities a discussion of special issues facing local government including poverty gender and environment new tools for local government including budgeting indicators municipal partnerships and capacity building The Myth of the Powerless State Linda Weiss, 2018-05-31 Conventional wisdom argues that the integration of the world economy is making national governments less powerful but Linda Weiss disagrees In an era when global society and the transnational market are trendy concepts she suggests that state capacities for domestic transformative strategies provide a competitive advantage Some of the most successful economies rely on state informed and state embedded institutions for governing the economy In fact she contends the strength of external economic pressures is largely determined domestically and the effect of such pressures varies with the strength of domestic institutions Weiss analyzes the sources and varieties of state capacity for governing industrial transformation in contemporary cases the unraveling of Sweden's distributive model of adjustment the evolution of developmental states in Northeast Asia and the parallel strengths of the German and Japanese systems of industrial coordination Her comparative perspective allows her to

show how different types of state capacity affect industrial vitality and domestic adjustment to global forces As economic integration proceeds she concludes state capabilities will matter more rather than less in fostering social well being and the creation of wealth     *Developmental States* Linda Low,2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts     **The Struggle for Development and Democracy: A General Theory** Alessandro Olsaretti,2023-03-13 In *The Struggle for Development and Democracy* Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9 11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti s memory     *Democratization, Development, and the Patrimonial State in the Age of Globalization* Eric N. Budd,2004-01-01 Postcolonial Third World states have historically faced two major challenges the promotion of economic development and the creation of stable democracies These challenges persist today in the face of globalization While some developing former colonial countries have gotten a foothold up on globalization others are not so fortunate In *Democratization Development and the Patrimonial State in the Age of Globalization* author Eric Budd investigates and compares forms of patrimonialism in several developing states The traditional criticism of development countries leveled by liberal democracies and their constituents is that too much patrimonialism acts as a barrier in the face of economic development and democratization The author considers this criticism through a comparative study of the Philippines Peru Taiwan Chile Ecuador and Indonesia Each case holds a specific relationship to patrimonialism As a result these cases provide the author with a unique window into the question of patrimonialism and its effect on economic development and the development of democratic societies *Democratization Development and the Patrimonial State in the Age of Globalization* offers a significant contribution to

disciplinary discussions in international relations economics sociology development studies and globalization studies      **The Politics of Cross-border Crime in Greater China** Sonny Shiu-Hing Lo, 2020-07-24 Organized crime has been on the rise in the Greater China region since the People's Republic opened up its economy and society in the mid 1980s Today triads from Hong Kong Macao and even Taiwan are involved in businesses in Guangdong Province and often recruit local Chinese for illegal activities such as extortion kidnapping assassinations and smuggling of illegal aliens This book provides a detailed and comprehensive study of how the state at the central and local levels has responded to the changing patterns and activities of cross border crime in Greater China It discusses the theoretical concept of organized crime the transnational nature of organized crime in recent years the significance of studying organized crime in Greater China and the implications for the national security of other countries such as the United States Canada and Australia The author reviews the history of organized crime and secret societies and addresses the legal complexities of dealing with criminal groups in the region He covers such topics as money laundering the financing of terrorist activities and regional efforts in fighting terrorism

**Contentious Agency and Natural Resource Politics** Markus Kröger, 2013-11-26 The looming depletion of non renewable resources has increased the global land grab in the past decade So far however the question of how and when people can influence economic outcomes has received little attention in the study of social movements Based on in depth ethnographic field research since 2003 in the industrial forestry expansion frontiers in Brazil and elsewhere in the global South this book presents a novel theory to explain how the interaction between resistance companies and the state determines investment outcomes The promotion of contentious agency by organizing and politicizing campaigning protesting networking and engaging in state and corporate remediated politics whilst maintaining autonomy is central to explaining how impacted people influence resource flows and block or slow projects they deem harmful to their livelihoods and the environment The conflicts between globalizing paper and pulp corporations and the landless peasants indigenous communities and other parties with alternative projects for the planet s future are studied to illustrate how a great transformation can be built upon progressive counter movements This systematic comparison of several cases illustrates the broader principles and problems endemic to the global political economy
