Houston, Oswaldo

Fernando Chinchilla Mazariegos, David Stuart, 2001 The Decipherment of Ancient Maya Writing is an important story of intellectual discovery and a tale of code breaking comparable to the interpreting of Egyptian hieroglyphs and the decoding of cuneiform This book provides a history of the interpretation of Maya hieroglyphs Introductory essays offer the historical context and describe the personalities and theories of the many authors who contributed to the understanding of these ancient glyphs     **Intermediate Elites in Pre-Columbian States and Empires** Christina M. Elson, R. Alan

Covey, 2022-06-21 From the Mesoamerican highlands to the Colca Valley in Peru pre Columbian civilizations were bastions of power that have largely been viewed through the lens of rulership or occasionally through bottom up perspectives of resistance Rather than focusing on rulers or peasants this book examines how intermediate elites both men and women helped to develop sustain and resist state policies and institutions Employing new archaeological and ethnohistorical data its contributors trace a 2 000 year trajectory of elite social evolution in the Zapotec Wari Aztec Inka and Maya civilizations This is the first volume to consider how individuals subordinate to imperial rulers helped to shape specific forms of state and imperial organization Taking a broader scope than previous studies it is one of the few works to systematically address these issues in both Mesoamerica and the Central Andes It considers how these individuals influenced the long term development of the largest civilizations of the ancient Americas opening a new window on the role of intermediate elites in the rise and fall of ancient states and empires worldwide The authors demonstrate how such evidence as settlement patterns architecture decorative items and burial patterns reflect the roles of intermediate elites in their respective societies arguing that they were influential actors whose interests were highly significant in shaping the specific forms of state and imperial organization Their emphasis on provincial elites particularly shifts examination of early states away from royal capitals and imperial courts explaining how local elites and royal bureaucrats had significant impact on the development and organization of premodern states Together these papers demonstrate that intricate networks of intermediate elites bound these ancient societies together and that competition between individuals and groups contributed to their decline and eventual collapse By addressing current theoretical concerns with agency resistance to state domination and the co option of local leadership by imperial administrators it offers valuable new insight into the utility of studying intermediate elites     Ancient Mesoamerica

archaeological practice by pulling together its main themes and approaches to show how it is changing the way archaeologists face the key questions of regional interaction Working with the term network as a collection of nodes and links as used in network science and social network analysis it juxtaposes a range of case studies and investigates the positives and negatives of network analysis With contributions by leading experts in the field the volume covers a broad range from Japan to America from the Palaeolithic to the Precolumbian

*Supply-Side Sustainability* Timothy F. H. Allen, Joseph A. Tainter, Thomas W. Hoekstra, 2003-02-19 While environmentalists insist that lower rates of consumption of natural resources are essential for a sustainable future many economists dismiss the notion that resource limits act to constrain modern creative societies The conflict between these views tinges political debate at all levels and hinders our ability to plan for the future Supply Side Sustainability offers a fresh approach to this dilemma by integrating ecological and social science approaches in an interdisciplinary treatment of sustainability Written by two ecologists and an anthropologist this book discusses organisms landscapes populations communities biomes the biosphere ecosystems and energy flows as well as patterns of sustainability and collapse in human societies from hunter gatherer groups to empires to today's industrial world These diverse topics are integrated within a new framework that translates the authors advances in hierarchy and complexity theory into a form

useful to professionals in science government and business The result is a much needed blueprint for a cost effective management regime one that makes problem solving efforts themselves sustainable over time The authors demonstrate that long term cost effective resource management can be achieved by managing the contexts of productive systems rather than by managing the commodities that natural systems produce

*Understanding Early Civilizations* Bruce G. Trigger, 2003-05-05 This book offers the first detailed comparative study of the seven best documented early civilizations ancient Egypt and Mesopotamia Shang China the Aztecs

and adjacent peoples in the Valley of Mexico the Classic Maya the Inka and the Yoruba Unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture Many of this study s findings are surprising and provocative Agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour      *Gordon R. Willey and American Archaeology* Jeremy A. Sabloff, William Leonard Fash, 2007 Gauging the impact of one scholar s contributions to modern archaeology      Substance of the Ancient Maya Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 Substance of the Ancient Maya Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the relationship between the living and the realm of the supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past
