Emerging Shield:

The Emerging Shield :. Kenneth Schaffel,1991 Air War Over America Leslie Filson,2003 Describes America s air sovereignty mission in the wake of the terrorist attacks of September 11 2001 Conference on Shielding of High-energy Accelerators, Held at New York, April 11 to 13, 1957 U.S. Atomic Energy Commission,1957 **The Emerging Shield** Kenneth Schaffel,1991 Searching the Skies David Frank Winkler,1997 Originally published in 1997 this hitherto hard to find study examines the impact that construction of radar stations and command facilities had on the American landscape With accompanying black and white photographs throughout the author explores patterns themes and trends that created influenced and formed the backdrop to the Cold War defense radar program This study provides an in depth look at the radar systems a state by state listing of the infrastructure that supported the systems and an extensive bibliography This historic content can be used to understand and evaluate properties associated with America s detection and command and control system Super Bomb Ken Young,Warner R. Schilling,2020-02-15 Super Bomb unveils the story of the events leading up to President Harry S Truman s 1950 decision to develop a super or hydrogen bomb That fateful decision and its immediate consequences are detailed in a diverse and complete account built on newly released archives and previously hidden contemporaneous interviews with more than sixty political military and scientific figures who were involved in the decision Ken Young and Warner R Schilling present the expectations hopes and fears of the key individuals who lobbied for and against developing the H bomb They portray the conflicts that arose over the H bomb as rooted in the distinct interests of the Atomic Energy Commission the Los Alamos laboratory the Pentagon and State Department the Congress and the White House But as they clearly show once Truman made his decision in 1950 resistance to the H bomb opportunistically shifted to new debates about the development of tactical nuclear weapons continental air defense and other aspects of nuclear weapons policy What Super Bomb reveals is that in many ways the H bomb struggle was a proxy battle over the morality and effectiveness of strategic bombardment and the role and doctrine of the US Strategic Air Command **The Emerging Shield** Kenneth Schaffel,2015-09-16 In the 1950s the United States Air Force led the way in building continental air defenses to protect the nation against bomber attack By the end of that decade the United States and Canada deployed a warning network of ground based radars extending from the United States southern borders to the arctic tundra a fleet of airborne early warning planes naval radar picket ships radar platforms the Texas Towers fastened to the ocean floor in the Atlantic Ocean and a civilian corps of ground observers Once warning of approaching enemy bombers had been received the military forces of the United States and Canada were prepared to unleash against the invader an arsenal of weapons that included fighter interceptors equipped with lethal air to air missiles anti aircraft artillery and short and long range surface to air missiles some nuclear tipped The whole system was coordinated through a technologically advanced computer oriented command and control system the first of its kind ever deployed The story of the rise of air defense in the United States after

World War II is complex and this volume does not presume to be a complete history of the subject. It focuses on the U S Air Force's predominant role in defense of the continental United States against manned bomber attacks. Although the U S Army, the U S Navy and the Canadian Air Force contributed resources to the mission, the U S Air Force had primary responsibility for research, development and deployment of most of the systems and weapons. The outstanding exception was anti-aircraft artillery, the province of the U S Army. In some respects, the Army can be said to have fielded a complementary air defense system separate from that of the Air Force. This book however examines the Army's part in the mission only as it concerns roles and missions, controversies with the Air Force. The volume begins with the U S Army Air Service's involvement with air defense in World War I and traces the story through to the late 1950s and early 1960s. At that time, the intercontinental ballistic missile supplanted the bomber as the most dangerous long range threat to North America, precipitating a dramatic decline in bomber defenses over the next two decades. A number of important themes emerge: the development of technology, particularly for command control and communications systems; roles and missions; debates, interpretations and analysis of the threat; and Air Force theories and approaches to offensive and defensive strategic warfare. The last is by far the most pervasive theme.

Michael Snow Annette Michelson, Kenneth White, 2019-10-29. Essential texts on the work of the influential artist Michael Snow: essays and interviews spanning more than four decades. Few filmmakers have had as large an impact on the recent avant garde film scene as Canadian Michael Snow. b. 1928. His works in a range of media: film, installation, video, painting, sculpture, sound, photography, drawing, writing and music, address the fundamental properties of his materials, the conditions of perception and experience, questions of authorship in technologically reproducible media and techniques of translation through written and pictorial representation. His film *Wavelength* 1967 is a milestone of avant garde cinema and possibly the most frequently discussed structural film ever made. This volume collects essential texts on Snow's work with essays and interviews spanning more than four decades. From its earliest issues, *October* has been a primary interlocutor of Snow's work and many of these texts first appeared in its pages. Written by such distinguished critics and scholars as Annette Michelson, Hubert Damisch and Malcolm Turvey, they document Snow's participation in postwar discourses of minimalism, postminimalism, photo conceptualism and avant garde cinema and examine particular works. Thierry de Duve's essay on linguistics in Snow's work appears alongside Snow's response. The volume also includes other writings by Snow: images from his 1975 work *Musics for Piano, Whistling, Microphone and Tape Recorder* and an interview with the artist conducted by Annette Michelson. Essays and interviews: Jean Arnaud, Rik Bullot, Hubert Damisch, Thierry de Duve, Andr   Hayum, Annette Michelson, Michael Snow, Amy Taubin, Malcolm Turvey, Kenneth White. Before that time these Indians had chronicled the heroic achievements of their warriors and chiefs on rock buffalo robes and tipi covers. As they came into increasing contact with American traders the artists recorded their experiences in pencil and crayon drawings on paper bound in ledger or account books. The drawings became known as ledger art. This volume presents in full color the Lansburgh collection in its entirety. The drawings are narratives depicting Plains lifeways through Plains eyes. They include landscapes and scenes of battle hunting courting ceremony incarceration and travel by foot horse train and boat. Ledger art also served to prompt memories of horse raids and heroic exploits in battle. In addition to showcasing the Lansburgh collection *Ledger Narratives* augments the growing literature on this art form by providing seven new essays that suggest some of the many stories the drawings contain and that look at them from innovative perspectives. The authors scholars of art history anthropology history and Native American studies touch on such themes as gender social status sovereignty tribal and intertribal politics economic exchange and confinement and space in a changing world. The Lansburgh collection includes some of the most arresting examples of Plains Indian art and the essays in this volume help us see and hear the multiple narratives these drawings relate.
