joins one of the most heated debates in analytic philosophy that over the nature of mind His provocative and clearly written book challenges physicalist views of human mental functioning and advances the concept of mind as an emergent individual Hasker begins by mounting a compelling critique of the dominant paradigm in philosophy of mind showing that contemporary forms of materialism are seriously deficient in confronting crucial aspects of experience He further holds that popular attempts to explain the workings of mind in terms of mechanistic physics cannot succeed He then criticizes the two versions of substance dualism most widely accepted today Cartesian and Thomistic and presents his own theory of emergent dualism Unlike traditional substance dualisms Hasker s theory recognizes the critical role of the brain and nervous system for mental processes It also avoids the mechanistic reductionism characteristic of recent materialism Hasker concludes by addressing the topic of survival following bodily death After demonstrating the failure of materialist views to offer a plausible and coherent account of that possibility he considers the implications of emergentism for notions of resurrection and the afterlife      *Evolution and the Emergent Self* Raymond L. *The Annual of Psychoanalysis, V. 19* Jerome A. Winer, 2013-05-13 Volume 19 of *The Annual of Psychoanalysis* turns to the ever intriguing relationship between Psychoanalysis and Art This introductory section begins with Donald Kuspit's scholarly reflections on the role of analysis in visual art and art criticism and then proceeds to a series of topical studies on Freud and art introduced by Harry Trosman Egyptologist Lorelei Corcoran explores the Egypt of Freud's imagination thereby illuminating our understanding of the archaeological metaphor Marion Tolpin offers new insights into Freud's analysis of the American writer Hilda Doolittle by focusing on the meaning of the Goddess Athene whose statue rested on Freud's desk to both analyst and analysand Stephen Toulmin examines Freud's artistic sensibility and places the historical significance of Freud's art collection in bold relief by looking at the many contemporary art objects Freud chose not to collect Danielle Knafo identifies key events in the early life of Austrian Expressionist Egon Schiele that were primary determinants of the content and form of his self portraits And Barbara Almond examines the spontaneous healing process depicted in Margaret Drabble's novel *The Needle's Eye* as an analogue to the kind of growth and development mobilized by the psychoanalytic process

Section II *Psychoanalysis and Development* begins with Barbara Fajardo's appreciation of the contribution of biology to analyzability she reviews findings from both infant research and biogenetic research that tend toward an understanding of constitution as resilience in development and subsequently in treatment Benjamin Garber adds to the psychoanalytic understanding of childhood learning disabilities by presenting the three and a half year analysis of a learning disabled child In a fascinating two part contribution *Bridging the Chasm Between Developmental Theory and Clinical Theory* Joseph Palombo sheds light on some of the knottiest problems in contemporary analysis including the relationship between childhood events and the reconstruction of those events in treatment

In Section III *Psychoanalysis and Empathy* Mary Newsome presents case material in support of her claim that the analyst's empathic understanding catalyzes the coalescence of the patient's affect and aim that is the patient's capacity to believe in and then realize his ambitions The acquisition of the capacity she contends not only betokens a specific kind of structure formation but is the bedrock of emerging self cohesion Her challenging paper is thoughtfully discussed by David Terman and Jerome Winer

Section IV of *The Annual* offers Jerome Kavka's appreciation of the work of N Lionel Blitzsten 1893-1952 Blitzsten the first Chicago psychoanalyst and one of America's most gifted clinicians and teachers anticipated modern concepts of narcissism in identifying narcissistic neuroses with special treatment requirements Morris Sklansky furthers our understanding of Blitzsten in his discussion of Kavka's essay Ranging across the

analytic canvas with presentations as edifying as they are provocative volume 19 of The Annual of Psychoanalysis challenges readers to wrestle with issues at the cutting edge of the discipline It takes a well deserved place in the preeminent continuing series in the field

**Travels with the Self** Philip Cushman, 2018-10-09 Travels with the Self uses a hermeneutic perspective to critique psychology and demonstrate why the concept of the self and the modality of cultural history are so vitally important to the profession of psychology Each chapter focuses on a theory concept sociopolitical or professional issue philosophical problem or professional activity that has rarely been critiqued from a historical sociopolitical vantage point Philip Cushman explores psychology's involvement in consumerism racism shallow understandings of being human military torture political resistance and digital living In each case theories and practices are treated as historical artifacts rather than expressions of a putatively progressive modern era science that is uncovering the one universal truth about human being In this way psychological theories and practices especially pertaining to the concept of the self are shown to be reflections of the larger moral

understandings and political arrangements of their time and place with implications for how we understand the self in theory and clinical practice Drawing on the philosophies of critical theory and hermeneutics Cushman insists on understanding the self one of the most studied and cherished of psychological concepts and its ill practitioners and healing technologies as historical cultural artifacts surprising almost sacrilegious concepts To this end each chapter begins with a historical introduction that locates it in the historical time and moral political space of the nation s the profession s and the author s personal context *Travels with the Self* brings together highly unusual and controversial writings on contemporary psychology that will appeal to psychoanalysts and psychotherapists psychologists of all stripes as well as scholars of philosophy history and cultural studies
