Many of the papers have only been published in places that are difficult to access The common theme of all the papers is the dynamics of thought Several of the papers have become minor classics and the volume bears witness of the wide scope of G rdenfors research and of his crisp and often witty style of writing The volume will be of interest to researchers in philosophy and other cognitive sciences

Emotions and Personhood Giovanni Stanghellini, René Rosfort, 2013-02-07 How does a person experience emotions What is the relationship between the experiential and biological dimensions of emotions How do emotions figure in a person s relation to the world and to other people How do emotions feature in human vulnerability to mental illness Do they play a significant role in the fragile balance between mental health and illness If emotions are in fact significant how are they relevant for treatment Emotions and personhood are important notions within the field of mental health care What they are and how they are related though is less evident This book provides a framework for understanding this relationship The authors argue for an account of emotions and personhood that attempts to understand human emotions from the combined approach of philosophy and psychopathology taking its models particularly from hermeneutical phenomenology and from dialectical psychopathology Within the book the authors develop a basic set of concepts for understanding what emotional experience means for a human person with the assumption that human emotional experience is fragile a fact which entails vulnerability to mental disturbance Drawing on research from psychiatry psychopathology philosophy and neuroscience the book will be valuable for both students and researchers in these disciplines and more broadly within the field of mental health

Emotions and Religious Dynamics Nathaniel A. Warne, 2016-05-13 We all feel emotions and are moved to action by them Religious communities often select and foster certain emotions over others Without understanding this it is hard to grasp the way groups view the world and each other Often it is the underlying emotional pattern of a group rather than its doctrines that either divides it from or attracts it to others These issues so important in today s world are explored in this book in a genuinely interdisciplinary way by anthropologists psychologists theologians and historians of religion and in some detailed studies of well and less well known religious traditions from across the world
