Empirical Knowledge Readings From Contemporary Sources:

Empirical Knowledge; Readings From Contemporary Sources, Edited by Roderick M. Chisholm and Robert J. Swartz Roderick M. Chisholm (Comp),1973 **Roderick M. Chisholm** R. Bogdan,2013-03-09 The aim of this series is to inform both professional philosophers and a larger readership of social and natural scientists methodologists mathematicians students teachers publishers etc about what is going on who s who and who does what in contemporary philosophy and logic PROFILES is designed to present the research activity and the results of already outstanding personalities and schools and of newly emerging ones in the various fields of philosophy and logic There are many Festschrift volumes dedicated to various philosophers There is the celebrated Library of Living Philosophers edited by P A Schilpp whose format influenced the present enterprise Still they can only cover very little of the contemporary philosophical scene Faced with a tremendous expansion of philosophical information and with an almost frightening division of labor and increasing specialization we need systematic and regular ways of keeping track of what happens in the profession PROFILES is intended to perform such a function Each volume is devoted to one or several philosophers whose views and results are presented and discussed The profiled philosopher s will summarize and review his their own work in the main fields of significant contribution This work will be discussed and evaluated by invited contributors Relevant historical and or biographical data an up to date bibliography with short abstracts of the most important works and whenever possible references to significant reviews and discussions will also be included Empirical Knowledge Roderick M. Chisholm (comp),1973 Epistemology: Contemporary Readings Michael Huemer,2006-03-10 This comprehensive anthology draws together classic and contemporary readings by leading philosophers on epistemology Ideal for any philosophy student it will prove essential reading for epistemology courses and is designed to complement Robert Audi s textbook Epistemology A Contemporary Introduction Routledge 1998 Themes covered include perception memory inductive inference reason and the a priori the architecture of knowledge skepticism the analysis of knowledge testimony Each section begins with an introductory essay guiding students into the topic Includes articles by Russell Hume Berkeley Malcolm Quine Carnap J L Austin Pollock Nozick Putnam G E Moore Huemer Reid Plato Bonjour Coady Carroll Fumerton Edwards Foster Howson Urbach Stove Empiricus Oakley Alston Gettier Clark Goldman Lehrer Paxson DeRose Dretske Klein and Chisholm Perceptual Knowledge Georges Dicker,2012-12-06 This book grew out of the lectures that I prepared for my students in epistemology at SUNY College at Brockport beginning in 1974 The conception of the problem of perception and the interpretation of the sense datum theory and its supporting arguments that are developed in Chapters One through Four originated in these lectures The rest of the manuscript was first written during the 1975 1976 academic year while I held an NEH Fellowship in Residence for College Teachers at Brown University and during the ensuing summer under a SUNY Faculty Research Fellowship I wish to express my sincere gratitude to the National Endowment for the Humanities and to the Research Foundation of the State University

of New York for their support of my research I am grateful to many former students colleagues and friends for their stimulating constructive comments and criticisms Among the former students whose reactions and objections were most helpful are Richard Motroni Donald Callen Hilary Porter and Glenn Shaikun Among my colleagues at Brockport I wish to thank Kevin Donaghy and Jack Glickman for their comments and encouragement I am indebted to Eli Hirsch for reading and commenting most helpfully on the entire manuscript to Peter M Brown for a useful correspondence concerning key arguments in Chapters Five and Seven to Keith Lehrer for a criticism of one of my arguments that led me to make some important revisions and to Roderick M *Empirical Knowledge; Readings from Contemporary Sources* Roderick M. Chisholm, Robert J. Swartz, 1973 The various essays in this book most of which were first published after World War II and all but one of which belong to the present century may be thought of as growing out of contemporary attempts to deal with the ancient problem of the criterion *An Introduction to the Theory of Knowledge* Noah Lemos, 2020-11-26 Now revised and containing three new chapters this book provides a clear and accessible introduction to epistemology or the theory of knowledge It discusses some of the main theories of justification including foundationalism coherentism reliabilism and virtue epistemology Other topics include the Gettier problem internalism and externalism skepticism the problem of epistemic circularity a priori knowledge naturalized epistemology and the epistemic significance of testimony and disagreement Intended primarily for students taking their first classes in epistemology this lucid and well written text will provide an excellent introduction to anyone interested in knowing more about this important area of philosophy

Skepticism about the External World Panayot Butchvarov, 1998 Do we know or even have evidence that external material objects exist Drawing powerfully on techniques from both analytic and continental philosophy Butchvarov offers a strikingly original approach to this perennial issue He argues that only a direct realist view of perception the view that in perception we are directly aware of material objects has any hope of providing a compelling response to the skeptic The seemingly insuperable problem for direct realism has always been to explain hallucination dreaming and other situations where the object of awareness is not a really existing physical object This has led many philosophers to adopt views in which perceptual consciousness involves a subjective state that is the direct object of awareness Butchvarov argues persuasively that all such views are helpless in the face of the skeptic's arguments His radical innovation is to insist that the direct object of perceptual and even dreaming and hallucinatory experience is usually a material object but not necessarily one that actually exists This leads to a sophisticated metaphysics in which reality is ultimately constructed by human decisions out of objects that are ontologically more basic but which cannot be said in themselves to be either real or unreal Butchvarov's ingenious approach to a longstanding philosophical issue as well as the extensive range of his references to traditional and contemporary discussions of the topic makes *Skepticism about the External World* a thrilling and essential book for philosophers and philosophically minded readers *When in Rome* Nancy L. Gifford, 1983-06-30 The book deals with an issue that is

intrinsically important philosophical relativism and with a topic that an introductory audience would find immediately interesting In short the author has succeeded in addressing a popular audience about an important problem that they will already be interested in because of the prevalence of relativism itself in contemporary culture Carl G Vaught Pennsylvania State University A book of just this introductory sort concerning relativism appealing and usable by undergraduates in precisely this way has been very badly needed for a long time The book fills a very real teaching need Patrick Grim State University of New York at Stony Brook It deals clearly sensitively and very readably with one of the most pervasive stubborn and destructive assumptions among students beginning philosophy Marcia Cavell Aufhauser State University of New York College at Purchase Ludwig Wittgenstein Stuart Shanker, David Kilfoyle, 2002 Wittgenstein scholarship has continued to grow at a pace few could have anticipated a testament both to the fertility of his thought and to the thriving state of contemporary philosophy In response to this ever growing interest in the field we are delighted to announce the publication of a second series of critical assessments on Wittgenstein emphasising both the breadth and depth of contemporary Wittgenstein research As well as papers on the nature and method of Wittgenstein's philosophy this second collection also relates to a broader range of topics including psychology politics art music and culture **Philosophy and Computer Science** Timothy Colburn, 2015-05-20 Colburn computer science U of Minnesota Duluth has a doctorate in philosophy and an advanced degree in computer science he's worked as a philosophy professor a computer programmer and a research scientist in artificial intelligence Here he discusses the philosophical foundations of artificial intelligence the new encounter of science and philosophy logic models of the mind and of reasoning epistemology and the philosophy of computer science touching on math abstraction software and ontology Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1975 *Philosophy of Science and Sociology* Edmund Mokrzycki, 2013-04-15 Originally published in 1983 This book concentrates on the impact of philosophy of science on sociology and other disciplines It argues that the impact of the philosophy of science on sociology from the rise of the Vienna Circle until the mid 1980s resulted in a deep reaching and in the author's view undesirable methodological reorientation in sociology *The Routledge Handbook of Philosophy of Memory* Sven Bernecker, Kourken Michaelian, 2017-07-14 Memory occupies a fundamental place in philosophy playing a central role not only in the history of philosophy but also in philosophy of mind epistemology and ethics Yet the philosophy of memory has only recently emerged as an area of study and research in its own right The Routledge Handbook of Philosophy of Memory is an outstanding reference source on the key topics problems and debates in this exciting area and is the first philosophical collection of its kind The forty eight chapters are written by an international team of contributors and divided into nine parts The nature of memory The metaphysics of memory Memory mind and meaning Memory and the self Memory and time The social dimension of memory The epistemology of memory Memory and morality History of philosophy of memory Within these sections central topics and problems are examined including truth consciousness imagination emotion

self knowledge narrative personal identity time collective and social memory internalism and externalism and the ethics of memory The final part examines figures in the history of philosophy including Aristotle Augustine Freud Bergson Wittgenstein and Heidegger as well as perspectives on memory in Indian and Chinese philosophy Essential reading for students and researchers in philosophy particularly philosophy of mind and psychology the Handbook will also be of interest to those in related fields such as psychology and anthropology

Karl Popper Philip Catton, Graham MacDonald, 2004-08-02 One of the most original thinkers of the century Karl Popper has inspired generations of philosophers historians and politicians This collection of papers specially written for this volume offers fresh philosophical examination of key themes in Popper's philosophy including philosophy of knowledge science and political philosophy Drawing from some of Popper's most important works contributors address his solution to the problem of induction his views on conventionalism and criticism in an open society and his unique position in 20th century philosophy They also examine the current relevance of Popper to understanding liberal democracy his critique of tribalism and his relationship with analytic philosophy in general and with Wittgenstein in particular as well as drawing on the studies of Isaac Newton and Albert Einstein to assess Popper's conception of science

Philosophical Foundation Surrendra Gangadean, 2008 Philosophical Foundation argues for clarity over and against meaning lessness which is implicit in various forms of skepticism and fideism Throughout the book critical analysis is applied to unexamined assumption in the areas of metaphysics and ethics in order to address long standing disputes The basic beliefs of western naturalism eastern idealism Greek dualism post modern anti realism and classical theism are incisively analyzed by reason for their coherence of meaning Those who have questions about knowledge and certainty faith and reason the existence of God and the problem of evil will find critical insight throughout this study in its use of presuppositional thinking Book jacket

Moral Theory and Legal Reasoning Scott Brewer, 1998

One Hundred Twentieth-Century Philosophers Stuart Brown, Diane Collinson, Dr Robert Wilkinson, Robert Wilkinson, 2008-02-20 One Hundred Twentieth Century Philosophers offers biographical information and critical analysis of the life work and impact of some of the most significant figures in philosophy this century Taken from the acclaimed Biographical Dictionary of Twentieth Century Philosophers the 100 entries are alphabetically organised from Adorno to Zhang Binglin and cover individuals from both continental and analytic philosophy The entries have an identical four part structure making it easy to compare and contrast information comprising biographical details a bibliography of major works a listing of relevant secondary and critical literature an appraisal of the philosopher's thoughts and achievements A separate glossary provides an introduction to the origins development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research

Does God Matter? Klaas Kraay, 2017-12-14 Does God Matter features eleven original essays written by prominent philosophers of religion that address this very important yet surprisingly neglected question One natural way to approach this question is to seek to understand what difference God's existence would

or does make to the value of the world and the well being of its inhabitants The first essay sets the stage for the discussion of this topic The three essays in Section I defend versions of pro theism the view that God s existence would or does make things better than they would otherwise be The four essays in Section II defend anti theism the view that God s existence would or does make things worse than they would otherwise be The three essays in Section III consider the interplay between the existential and axiological debates concerning the existence of God This book presents important research on a growing topic in philosophy of religion that will also be of keen interest to scholars working in other areas of philosophy such as metaphysics epistemology and value theory and in other disciplines such as religious studies and analytic theology

A Psychoanalysis of Act and Action Diego Enrique Londoño-Paredes, 2025-09-29 A Psychoanalysis of Act and Action brings together the study of the philosophy of action and Jacques Lacan s psychoanalytic theory Drawing on the works of Freud and Lacan this book examines desire and the unconscious as key frameworks for understanding action Londoño Paredes explores key premises in the philosophy of action while demonstrating how these may fall short in light of Lacan s ideas The book proposes an alternative to dominant philosophical interpretations exploring Lacan s framework through concepts such as the graph the act the transgressive act acting out and passage l acte The paradoxes of action along with forms of action that carry moral and symbolic weight are examined from a psychoanalytic perspective helping us to understand the interpretive boundaries of action By intertwining philosophical and psychoanalytic perspectives with clinical illustrations of real crimes the book offers a fresh approach to action and act A Psychoanalysis of Act and Action will be essential for psychoanalytically informed readers interested in Lacan It will also be of interest to academics and scholars of the philosophy of mind and action cultural studies criminology and mental disorders
