## **Humanitarian Development Paradigm Search For Global Justice:**

**The Humanitarian Development Paradigm** Wilfred L. David, 2004 In Humanitarian Development Paradigm Wilfred L. David makes a plea for the fundamental reorientation of the economics that guide conventional development discourse moving toward an emancipatory conversation focusing on human well being or people centered liberation His paradigm altering vision elevates core human values guaranteed rights and global justice in development thinking practice and policy

*Multinational Corporations and Global Justice* Florian Wettstein, 2009-10-08 Multinational Corporations and Global Justice Human Rights Obligations of a Quasi Governmental Institution addresses the changing role and responsibilities of large multinational companies in the global political economy This cross and inter disciplinary work makes innovative connections between current debates and streams of thought bringing together global justice human rights and corporate responsibility Conceiving of corporate social responsibility CSR from this unique perspective author Florian Wettstein takes readers well beyond the limitations of conventional notions which tend to focus on either beneficence or pure charity While the call for multinationals involvement in the solution of global problems has become stronger in recent times few specifics have been laid down regarding how to hold those institutions accountable in the global arena This text attempts to work out the normative basis underlying the responsibilities of multinational corporations thereby filling a crucial void in the literature and marking a milestone in the CSR debate

**The Sustainable City X** C.A. Brebbia, W.F. Florez-Escobar, 2015-09-01 Containing the proceedings of the 10th International Conference on Urban Regeneration and Sustainability this book addresses the multidisciplinary aspects of urban planning a result of the increasing size of cities the amount of resources and services required and the complexity of modern society Most of earth s population now lives in cities and the process of urbanisation continues generating many problems deriving from the drift of the population towards them These problems can be resolved by cities becoming efficient habitats saving resources in a way that improves the quality and standard of living The process however faces a number of major challenges related to reducing pollution improving main transportation and infrastructure systems New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment i e reduction in air water and soil pollution as well as efficient ways to deal with waste generation These challenges contribute to the development of social and economic imbalances and require the development of new solutions Large cities are probably the most complex mechanisms to manage However despite such complexity they represent a fertile ground for architects engineers city planners social and political scientists and other professionals able to conceive new ideas and time them according to technological advances and human requirements The challenge of planning sustainable cities lies in considering their dynamics the exchange of energy and matter and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems Topics covered include Urban Strategies Planning Development and Management Urban Conservation and Regeneration The Community and the City Eco town

 Metabolism      Human Security and Sierra Leone's Post-Conflict Development Francis Wiafe-Amoako, 2014-07-22 Achieving  
 security and development in the post conflict era is a challenge with which stakeholders have to grapple While stakeholders  
 are quick to claim success when physical hostilities cease between the belligerents ensuring sustainable peace has been a  
 daunting task In some countries in Africa the post conflict era is characterized by organizing elections to ensure greater  
 political participation It is believed that elections will begin a process of openness and trust in the governing system A  
 supplement to electoral democracy has been power sharing arrangements used to resolve post election violence and ensure  
 stability within the state However what underlie most conflicts in Africa is the marginalization and lack of an enabling  
 environment to achieve individual life objectives Policies and strategies to achieve security and enhance development post  
 conflict have at best been an extremely slow process and sometimes elusive In Sierra Leone for instance though the official  
 declaration of the end of war and the successful general elections held in 2002 2007 and 2012 have led to some domestic  
 stability developmental targets in the post conflict era have proceeded at a snail s pace The country continues to rank at the  
 bottom of most UNDP human development indicators since 2002 Human Security and Sierra Leone s Post Conflict  
 Development analyzes the extent to which human security issues have been addressed and subsequently implemented in the  
 post conflict reconstruction process While Sierra Leone has made tremendous efforts at implementing reforms in the areas of  
 political sensitization promotion of civil rights and civil liberties as well as personal security the lack on the part of the  
 government to effectively address the unemployment problem has negatively affected security and developmental targets  
 Thus the post conflict management strategies in Sierra Leone fail to secure and promote some aspects of human security  
 leading to fragile peace and slow progress in achieving sustainable security and development Human security is an all  
 encompassing phenomenon and must be addressed to achieve overall wellbeing of the people especially in post conflict  
 environments      **Unmaking China's Development** Peter Ho, 2017-10-26 A ground breaking new study of China s  
 development paradox predicated on informal and ambiguous institutions through property and resources      **Africa, Latin  
 America, and the Caribbean** Sabella Ogbobode Abidde, 2018-03-01 As important as state to state and multi state  
 cooperation have long proven to be many countries in the Global South have yet to fully explore its potentials Despite their  
 shared history of slavery colonialism and underdevelopment Africa Latin America and the Caribbean currently show a lack of  
 significant cooperation Africa Latin America and the Caribbean The Case for Bilateral and Multilateral Cooperation therefore  
 makes the case for an increased and renewed effort at bilateral and multilateral cooperation between the three regions In  
 this multidisciplinary work scholars make the case for renewing continuing and deepening relationships between the people

the state and the non governmental organizations in the three spheres taking not only an economic and political point of view but also considering sociological geographical and historical perspectives as well

*Philosophy and African Development* Lansana Keita, 2011-04-14 *Philosophy and African Development Theory and Practice* appraises development in a holistic manner It goes beyond the usual measurement in terms of economic achievement and widens the scope to include the impact that history of ideas political theory sociology social and political philosophy and political economy have had on development in Africa It is a departure from the traditional treatment of development by economists who point towards the so called time tested assertions and recommendations for sustainable development but which are yet bring about significant change in the economies of the so called developing societies It is on account of the failures of the economic development theory with its tepid prescriptions for sustainable development and poverty reduction that theories of development have now been expanded from mere economic analysis to include considerations of history sociology political economy and anthropology as could be discovered in this book Most of the contributions in this book have been prepared by philosophers across Africa and the United States who implicitly practise their discipline as one whose most effective modern function would be to appraise the human experience in all its dimensions from the standpoints of modern social and natural sciences all disciplinary offspring of philosophy itself With chapters ranging from issues of modernity and religious interpretations the human right to development the idea of African time the primacy of mental decolonisation and the type of education offered in Africa today and as a tool for development to development planning science technology and globalisation as well as issues of post coloniality among others The tenor of the
