House,1964      *Italy's Sorrow* James Holland,2008-04 During the Second World War the campaign in Italy was the most destructive fought in Europe a long bitter and highly attritional conflict that raged up the country s mountainous leg For frontline troops casualty rates at Cassino and along the notorious Gothic Line were as high as they had been on the Western Front in the First World War There were further similarities too blasted landscapes rain and mud and months on end with the front line barely moving And while the Allies and Germans were fighting it out through the mountains the Italians were engaging in bitter battles too Partisans were carrying out a crippling resistance campaign against the German troops but also battling the Fascists forces as well in what soon became a bloody civil war Around them innocent civilians tried to live through the carnage terror and anarchy while in the wake of the Allied advance horrific numbers of impoverished and starving people were left to pick their way through the ruins of their homes and country In the German occupied north there were more than 700 civilian massacres by German and Fascist troops in retaliation for Partisan activities while in the south many found themselves forced into making terrible and heart rending decisions in order to survive Although known as a land of beauty and for the richness of its culture Italy s suffering in 1944 1945 is now largely forgotten This is the first account of the conflict there to tell the story from all sides and to include the experiences of soldiers and civilians alike Offering extensive original research it weaves together the drama and tragedy of that terrible year including new perspectives and material on some of the most debated episodes to have emerged from the Second World War      [The diamond wreath: or, The price of a soul](#) Mary Helen Holt,1861      [The Joy of Golf](#) Ray Hamilton,2014-07-07 This pocket sized miscellany packed with fascinating facts handy hints and captivating stories and quotes from the world of golf is perfect for anyone who knows the incomparable joy of hitting the fairway      [Working Juju](#) Andrea Shaw Nevins,2019-11-15 Working Juju examines how fantastical and unreal modes are deployed in portrayals of the Caribbean in popular and literary culture as well as in the visual arts The Caribbean has historically been constructed as a region mantled by the fantastic Andrea Shaw Nevins analyzes such imaginings of the Caribbean and interrogates the

freighting of Caribbean infused spaces with characteristics that register as fantastical These fantastical traits may be described as magical supernatural uncanny paranormal mystical and speculative The book asks throughout What are the discursive threads that run through texts featuring the Caribbean fantastic In Working Juju Nevins teases out the multilayered and often obscured connections among texts such as the Pirates of the Caribbean film series planter and historian Edward Long s History of Jamaica and Grenadian sci fi writer Tobias Buckell s Xenowealth series set in the future Caribbean Fantastical representations of the region generally occupy one of two spaces In the first the Caribbean fantastic facilitates an imagining of the colonial experience and its aftermath as one in which the region and its representatives exercise agency and in which the humanity of the region s inhabitants is asserted Alternately the fantastic is sometimes situated as a signifier of the irrational and uncivilized The thread that unites portrayals of the fantastic Caribbean in the latter kind of works is that they tend to locate Caribbean belief systems as powerful even at times inadvertently in contradiction to the text s ideological posture Nevins shows how the singular Caribbean identity that emerges in these text is at odds with the complex historical narratives of actual Caribbean countries and colonies Rising Sun, Falling Skies Jeffrey Cox,2014-03-20 Following the attack on Pearl Harbor the Japanese offensive in the Far East seemed unstoppable Allied forces engaged in a futile attempt to halt their rapid advance culminating in the massed fleet of American British Dutch and Australian forces ABDA clashing with the Japanese at the battle of the Java Sea the first major sea battle of World War II in the Pacific But in a campaign crippled by poor leadership and disastrous decisions the Allied response was catastrophic losing their largest warships and their tenuous toe hold in the south Pacific within the first 72 hours of the battle This defeat left ground troops cut off from reinforcement and supply with obsolete equipment no defense against endless Japanese air attacks and with no chance of retreat However although command decisions were to condemn the Allies to defeat the Allied goal was never an outright victory simply a delaying action Facing a relentless and thoroughly vicious enemy the combined forces responded not by running or surrendering but by defiantly holding on in a struggle that was as much a test of character bravery and determination as it was a test of arms ultimately costing the Allies ten vessels and the lives of 2 100 brave sailors In Rising Sun Falling Skies Jeffrey Cox examines the events and evidence surrounding the Java Sea Campaign reconstructing battles that in hindsight were all but hopeless and revealing where fatal mistakes and missed opportunities condemned the Allied forces in an insightful and compelling study of the largely overlooked clash in the Java Sea

collected research results and perspectives of researchers working in the field of machine learning ML applied to the analysis of microbiome data we are launching the second volume to collate any new findings in the field to further our understanding and encourage the participation of experts worldwide in the discussion The success of ML algorithms in the field is substantially due to their capacity to process high dimensional data and deal with uncertainty and noise However to maximize the combinatorial potential of these emerging fields microbiome and ML researchers have to deal with some aspects that are complex and inherently related to microbiome data Microbiome data are convoluted noisy and highly variable and non standard analytical methodologies are required to unlock their clinical and scientific potential Therefore although a wide range of statistical modelling and ML methods are available their application is only sometimes optimal when dealing with microbiome data
