**Our Long Hairitage** Roger Sigler,2011-06-07 Most causes of hair loss are manmade Proper nutrition is one thing But a lush rain forest is ruined by clear cutting just as close cropping the head invites a desert To add insult to injury biocides which include many hair products and chlorine aggravate the environment further by destroying the vital inhabitants thereof These things cause the scalp to become deserted In contrast our long haired ancestors had healthy heads of hair because they manipulated nature little This unique book traces the history of this fact as well as the origins of excessive hair removal during times of religious idolatry Learn the benefits of longer hair from science health Scripture and history to prevent hair loss and skin cancer for healthy hair and scalp to protect your head and to promote your unique identity This easy to understand book abounds with 100 pictures and other illustrations handy tables and is completely referenced The fight against hair loss will never be won until you understand that the real root causes are self inflicted or enforced against you by others Read this book first and get the facts before wasting money on products

**Modern Biogeochemistry** Vladimir N. Bashkin,2006-12-29 At present quantitative ecological risk assessment is widely used in different contexts however very often without an understanding of the natural mechanisms that drive the processes of environmental and human risk Its application is often accompanied by

high uncertainty about risk values On the other hand the sustainability of modern technoecosystems is known because of their natural biogeochemical cycling that has been transformed to various extents by anthropogenic studies Accordingly our understanding of the principal mechanisms that drive the biogeochemical food webs allows us to present a quantitative ecological risk assessment and to propose technological solutions for management of various ERA enterprises It also enables us to devise a powerful mechanism for ecological insurance to assign responsibilities and protect rights while managing the control of damage from natural and anthropogenic accidents and catastrophes
