Human Anatomy and Physiology John W. Hole,1990 **Laboratory Manual for Anatomy and Physiology** Patricia
J. Donnelly,George A. Wistreich,1990 **How Shelter Pets are Brokered for Experimentation** Allie Phillips,2010-12-28

Back in the 1940s the practice referred to as Pound seizure became a common practice in taxpayer funded animal
shelters across the country Whether for cosmetic testing human or animal drug testing medical technique and tool testing or
biochemical testing these once family pets are subjected to experimentation that often ends in death While many states fail to
keep accurate data the number of pets that become victims of pound seizure easily reaches the thousands and though most
citizens are unaware of the practice it may very well be happening at their local animal shelter Pound seizure remains a dirty
little secret in American society but the practice is moving toward extinction with the help of local citizens advocating for
change at their shelter as well as animal rescue and welfare organizations providing assistance and advocacy Learning more
about the practice as well as alternatives will help give readers a fuller picture of what's happening in American animal
shelters and what they can do to stem the tide of dealers and brokers sweeping off animals to their almost certain demise
