## Logic And Transcendence:

**Logic and Transcendence** Frithjof Schuon, 1984      Logic and Transcendence Frithjof Schuon, 2009-08-16 In this new edition of his most important philosophical work Frithjof Schuon confronts the pitfalls of rationalism and relativism within modern philosophy This new edition comprises a fully revised translation from the French original and contains an extensive Appendix with previously unpublished letters and other private writings      The Logic of Transcendence Thomas Arthur Duggan, 1976      *Frithjof Schuon and the Perennial Philosophy* Harry Oldmeadow, 2010-04-16 This is the first comprehensive study of the intellectual and spiritual message of world renowned philosopher Frithjof Schuon 1907 1998 the foremost spokesman of the Perennialist or Traditionalist school of comparative religious thought Intended primarily as an introductory guide to Schuon s writings Harry Oldmeadow s book focuses on Schuon s exposition of metaphysics and the transcendent unity of religions his presentation of the religious traditions of East and West including the spiritual heritage of the American Indians his criticism of the modern world and his views on sacred art and beauty Also included is an overview of Schuon s paintings and poetry as well as his insights on prayer and virtue in the spiritual life This ground breaking work provides the general reader with a coherent and systematic account of the Perennial Philosophy and covers all aspects of Schuon s work Publisher s website      Metaphysics and Transcendence Arthur Gibson, 2004-05-05 This author presents new metaphysics with a genealogy based on counter intuition and locates counter intuition and complexity at the foundations of truth This book stimulates future philosophical and religious discussion      Elasticized Ecclesiology Ulrich Schmiedel, 2017-01-17 This study confronts the current crisis of churches In critical and creative conversation with the German theologian Ernst Troeltsch 1865 1923 Ulrich Schmiedel argues that churches need to be elasticized in order to engage the other Examining contested concepts of religiosity community and identity Schmiedel explores how the closure of church against the sociological other corresponds to the closure of church against the theological other Taking trust as a central category he advocates for a turn in the interpretation of Christianity from propositional possession to performative project so that the identity of Christianity is done rather than described Through explorations of classical and contemporary scholarship in philosophy sociology and theology Schmiedel retrieves Troeltsch s interdisciplinary thinking for use in relation to the controversies that encircle the construction of community today The study opens up innovative and instructive approaches to the investigation of the practices of Christianity past and present Eventually church emerges as a work in movement continually constituted through encounters with the sociological and the theological other      **Freedom, Transcendence, and Identity** Pradip Kumar Sengupta, 1988 Commemoration volume for Kalidas Bhattacharya 1911 1984 Indian philosopher comprises articles on Indian philosophy      Heidegger and Logic Greg Shirley, 2010-03-18 There is a tradition of interpreting Heidegger s remarks on logic as an attempt to flout revise or eliminate logic and of thus characterizing Heidegger as an irrationalist Heidegger and Logic looks closely at Heidegger s writings on logic in the Being and Time era and argues that

Heidegger does not seek to discredit logic but to determine its scope and explain its foundations Through a close examination of the relevant texts Greg Shirley shows that this tradition of interpretation rests on mischaracterizations and false assumptions What emerges from Heidegger s remarks on logic is an account of intelligibility that is both novel and relevant to issues in contemporary philosophy of logic Heidegger s views on logic form a coherent whole that is an important part of his larger philosophical project and helps us understand it better and that constitutes a unique contribution to the philosophy of logic

Transcendence in Heidegger's Early Thought Erik Kuravsky,2023-11-27 This book demonstrates how Heidegger s departure from ontotheology occurs initially as a preparation for the concept of Dasein s transcendence and subsequently as its explicit development and overcoming Dasein s transcendence is revealed as the foundation for the subsequent concept of Beyng as an Event which stands in contrast to all ontotheological perspectives that assert a singular a priori foundation of the universe attributed to beings God consciousness or even an independent process of Being that doesn t rely on Dasein The book illustrates that transcendence is not an attribute of human consciousness or a connection to something external to it Instead as a primal act transcendence paves the way for a non representational dwelling in the essence of a historically unfolding Being a contemplative recollection of the truth of Beyng Throughout the book there is a gradual progression towards an understanding of transcendence as an active engagement wherein we do transcendence This process involves a reconstruction of the ontological significance of action emphasizing its performative embeddedness in existence and its inseparability from Beyng

Logic Vern S. Poythress,2013-02-28 For the well rounded Christian looking to improve their critical thinking skills here is an accessible introduction to the study of logic parts 1 2 as well as an in depth treatment of the discipline parts 3 4 from a professor with 6 academic degrees and over 30 years experience teaching Questions for further reflection are included at the end of each chapter as well as helpful diagrams and charts that are appropriate for use in high school home school college and graduate level classrooms Overall Vern Poythress has undertaken a radical recasting of the study of logic in this revolutionary work from a Christian worldview

Paths To The Heart: Sufism And The Chris James S. Cutsinger,2010-08-01 Despite the long and well known history of conflict between Christians and Muslims their mystical traditions especially in the Christian East and in Sufism have shared for centuries many of the same spiritual methods and goals The purpose of this book the first major publication of its kind is to promote precisely this more inward kind of ecumenical perspective These essays point to a spiritual heart in which the deeper meaning of Christian and Muslim beliefs and practices come alive and where spiritual pilgrims may discover beyond the level of seemingly contradictory forms an inner commonality with those who follow other paths

**Transcendence and the Logical Difficulties of Transcendence** Bent Schultzer,1935

**Decolonial Travel** Avishek Ray,2024-11-08 This volume brings together scholarship on indigenous forms of travel to decolonize travel theory It looks at certain minoritarian vernacular traveling cults very rarely examined that compel us to rethink on the one hand the conventional tropes of and rationales for travel and on the other hand notions

of post coloniality nationalism and modernity in the context of India The book illustrates the enduring problematic of the colonial episteme how it deploys pervasive categories through which travel practices are sought to be understood and why such categories are inadequate in accounting for the vernacular traveling cults in question In studying the vernacular world making in and through these cults this book offers critical insights on how they defy the log istics of the imperial categories and why they must be read as expressions of decoloniality An important contribution to travel studies the book will be an indispensable resource for students and researchers of South Asian studies travel theory Indian literary and cultural studies cultural history and anthropology sociology and decoloniality Literary Worlds and Deleuze Zornitsa Dimitrova,2016-12-20

Literary Worlds and Deleuze contributes to debates on mimesis by offering an expressionist take on the matter of the generation of literary worlds in drama In examining postdramatic plays by Sarah Kane Martin Crimp Caryl Churchill and Laura Wade the book outlines a dynamic ontology of mimesis Rather than pertaining to a static ontology of being expressionist mimesis is generative and renews itself constantly without arriving at an entelechial end In exploring the fluxional field of forces and relations that underlie the order of representation expressionist mimesis is well suited to account for the ontologically uncertain realities of postdramatic theatre The concepts of expression and the event of sense Gilles Deleuze become part of a generative model that incorporates pre linguistic and supra conceptual constituents within the genesis of representation Foundation David G. Leahy,1996-01-01 This book presents the ontological and logical foundation of a new form of thinking the beginning of an absolute phenomenology It does so in the context of the history of thought in Europe and America It explores the ramifications of a categorically new logic Thinkers dealt with include Plato Galileo Hegel Kierkegaard Marx Nietzsche Husserl Heidegger Peirce James Dewey Derrida McDermott and Altizer

*Numinous Subjects* Lucy Tatman,2007-01-01 Part religious studies part feminist theory part philosophy part indescribable such is *Numinous Subjects* Described by the author as a kaleidoscopic exploration of why three gendered figures of the sacred matter within western culture the experience of reading this text truly is akin to gazing through a constantly turning kaleidoscope Images concepts phrases and quotes are continually revisited recombined though never repeated in quite the same way From these tumbling constellations arises a new understanding and wary appreciation of the figures of the virgin the mother and the whore Drawing on the insights of thinkers as diverse as Rudolph Otto Julia Kristeva Simone de Beauvoir and Martin Buber *Numinous Subjects* simultaneously expands and focuses our attention on the myth of the sacred and its implications for female subjects in western culture today Rethinking Ibn 'Arabi Gregory A. Lipton,2018-04-02 The thirteenth century mystic Ibn Arabi was the foremost Sufi theorist of the premodern era For more than a century Western scholars and esotericists have heralded his universalism arguing that he saw all contemporaneous religions as equally valid In *Rethinking Ibn Arabi* Gregory Lipton calls this image into question and throws into relief how Ibn Arabi s discourse is inseparably intertwined with the absolutist vision of his own religious milieu that is the triumphant claim

that Islam fulfilled superseded and therefore abrogated all previous revealed religions Lipton juxtaposes Ibn Arabi's absolutist conception with the later reception of his ideas exploring how they have been read appropriated and universalized within the reigning interpretive field of Perennial Philosophy in the study of Sufism The contours that surface through this comparative analysis trace the discursive practices that inform Ibn Arabi's Western reception back to the eighteenth and nineteenth century study of authentic religion where European ethno-racial superiority was wielded against the Semitic Other both Jewish and Muslim Lipton argues that supersessionist models of exclusivism are buried under contemporary Western constructions of religious authenticity in ways that ironically mirror Ibn Arabi's medieval absolutism **A Reading**

**of Gilles Deleuze's Logic of Sense** Mehdi Parsa, 2022-11-07 This is a reading of Gilles Deleuze's masterpiece Logic of Sense It provides a thorough and systematic reading of Deleuze's book by focusing on the aspects that are neglected in the existing literature Specifically the claim that Deleuze's Logic of Sense provides a convincing answer for the most important question of the history of philosophy regarding the relation between thought and existence as well as the relation between logic and ontology is defended The answer is that if thought is related to existence logic is supposed to be not the logic of essence but rather the logic of sense This analysis is pursued respectively through Deleuze's readings of Frege the ancient Stoics Lewis Carroll Kant Lautman Leibniz and Melanie Klein **Faith, Reason and the Existence of God** Denys

Turner, 2004-09-16 The proposition that the existence of God is demonstrable by rational argument is doubted by nearly all philosophical opinion today and is thought by most Christian theologians to be incompatible with Christian faith This book argues that on the contrary there are reasons of faith why in principle the existence of God should be thought rationally demonstrable and that it is worthwhile revisiting the theology of Thomas Aquinas to see why this is so The book further suggests that philosophical objections to proofs of God's existence rely upon an attenuated and impoverished conception of reason which theologians of all monotheistic traditions might wish to reject Denys Turner proposes that on a broader and deeper conception of it human rationality is open to the sacramental shape of creation as such and in its exercise of rational proof of God it in some way participates in that sacramentality of all things **Pedagogy and Practice** Patricia

Murphy, Kathy Hall, Janet Soler, 2012-06-21 This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners and to be reflexive about their own practices and contexts Learning involves a transformation of identity which occurs through negotiation and repositioning through new ways of relating and through different ways of participating in practices This book examines the meaning and implications for pedagogy in educational and workplace settings and the role of the teacher in this sociocultural view of learning By illustrating the mediated nature of agency and identity the chapters reconceptualise the teacher and the learner and show different ways of supporting learning and being a teacher The settings represented range from nursery to university and from out of school to institutionally based and work place situations Curricular aspects represented include popular culture critical literacy multimodality the arts and

new technologies Teachers and student teachers as learners are also represented in the accounts assembled The book takes a sociocultural view of learning and considers the pedagogical implications of this view It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities The contributions challenge ways of thinking about practice both teaching and assessment and argue for practices that bridge between learners worlds their communities and educational institutions Drawing on the international literature this book will be essential reading for students of curriculum learning and assessment in all sectors from pre primary to further and higher education It is suitable as a core text for masters and taught doctorate programmes It will also be of interest to a wide range of professionals involved with curriculum learning and the practice of teaching and assessment This book is relevant to those in work based and professional education and training and in informal educational settings as well as traditional educational institutions at all levels A unique collection in a field that is underrepresented it will also be of interest to an academic audience
