Philosophy and Theory in Educational Research Amanda Fulford, Naomi Hodgson, 2016-06-10 *Philosophy and Theory in Educational Research* Writing in the margin explores the practices of reading and writing in educational philosophy and theory Showing that there is no right way to approach research in educational philosophy but illustrating its possibilities this text invites an engagement with philosophy as a possibility and opening possibilities for educational research Drawing on their own research and theoretical and philosophical sources the authors investigate the important issue of what it means to read and write when there is no prescribed structure Innovative in its contribution to the literature this edited volume enlightens readers in three ways The volume focuses on the practices of reading and writing that are central to research in educational philosophy suggesting that these practices constitute the research rather than simply reporting it It is not a prescriptive guide and should not be read

procedurally Rather it is intended to illustrate the possibilities for this kind of research and to suggest starting points for those pursuing research projects Finally attention is given to the ways in which conducting educational philosophy can be educative in itself both to the researcher in writing it and to its audience in reading it With contributions from international scholars in the field of educational philosophy this book is a valuable guide for practitioner researchers taught postgraduate and doctoral students and early career researchers in university education departments Academic staff teaching research methods and seeking to introduce their students to philosophy as research without wishing to offer a prescriptive how to guide will also find this book of particular interest *The SAGE Handbook for Research in Education* Clifton F. Conrad, Ronald C. Serlin, 2011-06-10 The SAGE Handbook for Research in Education Pursuing Ideas as the Keystone of Exemplary Inquiry edited by Clifton F Conrad and Ronald C Serlin stimulates and encourages students faculty and educational practitioners including individuals in Pre K 16 education government and the private sector who conduct applied and policy oriented educational research to place the pursuit of ideas at the epicenter of their research from framing meaningful problems to identifying and addressing key challenges to the reporting and dissemination of their findings As well as supporting readers to place the pursuit of ideas as the keystone of exemplary inquiry the Handbook draws on the perspectives of scholars representing diverse fields within the field of education from pre kindergarten to elementary and secondary school to higher education as well as qualitative quantitative and mixed methods approaches to inquiry The chapters are punctuated throughout by the voices of authors who wrestle with the formidable challenges of framing and conducting and reporting meaningful inquiry *Philosophy in Educational Research* David Bridges, 2016-12-01 This book provides critical and reflective discussions of a wide range of issues arising in education at the interface between philosophy research policy and practice It addresses epistemological questions about the intellectual resources that underpin educational research explores the relationship between philosophy and educational research and examines debates about truth and truthfulness in educational research Furthermore it looks at issues to do with the relationship between research practice and policy and discusses questions about ethics and educational research Finally the book delves into the deeply contested area of research quality assessment The book is based on extensive engagement in empirically based educational research projects and in the institutional and professional management of research as well as in philosophical work It clarifies what is at stake in international debates around educational research and teases out the nature of the arguments and where argument permits the conclusions to which these point The book discusses these familiar themes using less predictable sources and points of reference such as codes of social obligation in contemporary Egypt and New Zealand the Soviet and the inspiration of the nineteenth century philosopher Abai in contemporary Kazakhstan seventeenth century France Pascal and the disputes between Jesuits and Jansenites eighteenth century Italy Giambattista Vico and la scienza nuova educational magic in traditional Ethiopia and ends at a banquet with Socrates and dinner with wine and a conversation

loving Montaigne The Logic of Imaginative Education Richard C. McCleary, 1993-01-01 *Research Methods in Education* Louis Cohen, Lawrence Manion, Keith Morrison, 2013-03-07 This rewritten expanded and updated 7th edition of the long running bestseller *Research Methods in Education* encompasses the whole range of methods currently employed by educational research at all stages It offers plentiful and rich practical advice underpinned by clear theoretical foundations research evidence and up to date references Chapters new to this edition cover Causation critical educational research evaluation and the politics of research including material on cross cultural research mixed methods and participatory research Choosing and planning a research project including material on sampling research questions literature reviews and ethical issues Meta analysis research syntheses and systematic reviews Virtual worlds and internet research Using and analysing visual media and data in educational research Organizing and presenting qualitative data content analysis coding and computer analysis themes narratives conversations and discourses grounded theory Understanding and choosing statistical tests descriptive and inferential statistics multi dimensional measurement and factor analysis *Research Methods in Education* is essential reading for both the professional researcher and students of education at undergraduate and postgraduate level who need to understand how to plan conduct analyse and use research The textbook is accompanied by a website www.routledge.com/textbooks/cohen7e PowerPoint slides for every chapter contain an outline of the chapter structure followed by a thorough summary of the key points ideal for both lecturers and students Within the book a variety of internet resources are referred to and these references have been included here with links to the websites A wide range of supplementary documents are available for many chapters providing additional guidance and examples They range from guidelines for the contents of a research proposal with a worked example to screen print manuals for using SPSS and QSR N6 NUD IST exportable to N Vivo plus data files *Educational Research: The Attraction of Psychology* Paul Smeyers, 2012-10-24 The closely argued and provocative contributions to this volume challenge psychology's hegemony as an interpretive paradigm in a range of social contexts such as education and child development They start from the core observation that modern psychology has successfully penetrated numerous domains of society in its quest to develop a properly scientific methodology for analyzing the human mind and behaviour For example educational psychology continues to hold a central position in the curricula of trainee teachers in the US while the language of developmental psychology holds primal sway over our understanding of childrearing and the parent child relationship Questioning the default position of modern psychology as a way of conceptualizing human relations this collection of papers reexamines key assumptions that include psychology's self image as a scientific discipline Authors also argue that the dogma of neuropsychology in education has demoted concepts such as emotion feeling and relationship so that they are now blind spots in educational theory Other chapters offer a cautionary analysis of how misshapen notions of psychology can legitimize eugenics as in Nazi Germany and poison racial attitudes Above all has psychology with its focus on individual merit been complicit in hiding the impacts of

power and privilege in education This bracing new volume adopts a broader definition of education and childrearing that admits the essential contribution of the humanities to the proper study of mankind This publication as well as the ones that are mentioned in the preliminary pages of this work were realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Faces and Spaces of Educational Research
