Formal Specification Of Distributed Multimedia Systems G. Blair, L. Blair, H. Bowman, A. Chetwynd, 1997-11-30
Written in response to the lack of attention paid to software engineering techniques that support the process of prototypical development on multimedia systems the authors of this text have provided a comprehensive investigation of the application of formal techniques to this area of systems development Particular attention is paid to the new formal specification approach which is directly targeted at the real time requirements of distributed multimedia computing Through the evaluation and introduction of this approach the authors have produced a text for researchers practitioners and advanced students in the field of distributed systems telecommunications and formal methods *The Formal Specification and Verification of Distributed Multimedia Systems* Lynne Blair, 1994 Formal Distributed Multimedia Systems G. Blair, 1997-10-15 This text brings together techniques and applications from distributed multimedia software engineering It combines know how from the formal systems world with distributed multimedia applications **Formal Methods for Open Object-Based Distributed Systems IV** Scott F. Formal Methods for Distributed Processing

Howard Bowman,John Derrick,2001-10-22 Originally published in 2002 this book presents techniques in the application of formal methods to object based distributed systems A major theme of the book is how to formally handle the requirements arising from OO distributed systems such as dynamic reconfiguration encapsulation subtyping inheritance and real time aspects These may be supported either by enhancing existing notations such as UML LOTOS SDL and Z or by defining fresh notations such as Actors Pi calculus and Ambients The major specification notations and modelling techniques are introduced and compared by leading researchers The book also includes a description of approaches to the specification of non functional requirements and a discussion of security issues Researchers and practitioners in software design object oriented computing distributed systems and telecommunications systems will gain an appreciation of the relationships between the major areas of concerns and learn how the use of object oriented based formal methods provides workable solutions
