Formalizing Commonsense Papers By John McCarthy:

Formalizing Common Sense John McCarthy, 1990 This is a collection of papers written by John McCarthy on artificial intelligence The papers range from informal surveys written for a general audience to technical discussions of research problems that should be of interest to specialists

Commonsense Reasoning Erik T. Mueller, 2010-07-26 To endow computers with common sense is one of the major long term goals of Artificial Intelligence research One approach to this problem is to formalize commonsense reasoning using mathematical logic Commonsense Reasoning is a detailed high level reference on logic based commonsense reasoning It uses the event calculus a highly powerful and usable tool for commonsense reasoning which Erik T Mueller demonstrates as the most effective tool for the broadest range of applications He provides an up to date work promoting the use of the event calculus for commonsense reasoning and bringing into one place information scattered across many books and papers Mueller shares the knowledge gained in using the event calculus and extends the literature with detailed event calculus solutions to problems that span many areas of the commonsense world Covers key areas of commonsense reasoning including action change defaults space and mental states The first full book on commonsense reasoning to use the event calculus Contextualizes the event calculus within the framework of commonsense reasoning introducing the event calculus as the best method overall Focuses on how to use the event calculus formalism to perform commonsense reasoning while existing papers and books examine the formalisms themselves Includes fully worked out proofs and circumscriptions for every example

Common Sense, Reasoning, & Rationality Renée Elio, 2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship

Representations of Commonsense Knowledge Ernest Davis, 2014-07-10 Representations of Commonsense Knowledge provides a rich language for expressing commonsense knowledge and inference techniques for carrying out commonsense knowledge This book provides a survey of the research on commonsense knowledge Organized into 10 chapters this book begins with an overview of the basic ideas on artificial intelligence commonsense reasoning This text then examines the structure of logic which is roughly analogous to that of a programming language Other chapters describe how rules of universal validity can be applied to facts known with absolute certainty to deduce other facts known with absolute certainty This book discusses as well some prominent issues in plausible inference The final chapter deals with commonsense knowledge about the interrelations and interactions among agents and discusses some issues in human and social interactions that have been studied in the artificial intelligence literature This book is a valuable resource for students on a graduate course on knowledge representation

Modeling and Using Context Patrick Blackburn, Chiara Ghidini, Roy M. Turner, Fausto Giunchiglia, 2007-10-13 The refereed proceedings of the 4th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2003 held in Stanford CA USA in June 2003 The 31 full papers and 15 short papers

presented were carefully reviewed selected and revised for inclusion in the book The papers presented deal with the interdisciplinary topic of modeling and using context from various points of view ranging through cognitive science formal logic artificial intelligence computational intelligence philosophical and psychological aspects and information processing Highly general philosophical and theoretical issues are complemented by specific applications in various fields

A Guided Tour of Artificial Intelligence Research Pierre Marquis, Odile Papini, Henri Prade, 2020-05-08 The purpose of this book is to provide an overview of AI research ranging from basic work to interfaces and applications with as much emphasis on results as on current issues It is aimed at an audience of master students and Ph D students and can be of interest as well for researchers and engineers who want to know more about AI The book is split into three volumes the first volume brings together twenty three chapters dealing with the foundations of knowledge representation and the formalization of reasoning and learning Volume 1 Knowledge representation reasoning and learning the second volume offers a view of AI in fourteen chapters from the side of the algorithms Volume 2 AI Algorithms the third volume composed of sixteen chapters describes the main interfaces and applications of AI Volume 3 Interfaces and applications of AI Implementing reasoning or decision making processes requires an appropriate representation of the pieces of information to be exploited This first volume starts with a historical chapter sketching the slow emergence of building blocks of AI along centuries Then the volume provides an organized overview of different logical numerical or graphical representation formalisms able to handle incomplete information rules having exceptions probabilistic and possibilistic uncertainty and beyond as well as taxonomies time space preferences norms causality and even trust and emotions among agents Different types of reasoning beyond classical deduction are surveyed including nonmonotonic reasoning belief revision updating information fusion reasoning based on similarity case based interpolative or analogical as well as reasoning about actions reasoning about ontologies description logics argumentation and negotiation or persuasion between agents Three chapters deal with decision making be it multiple criteria collective or under uncertainty Two chapters cover statistical computational learning and reinforcement learning other machine learning topics are covered in Volume 2 Chapters on diagnosis and supervision validation and explanation and knowledge base acquisition complete the volume

Computational Logic in Multi-Agent Systems João Leite, 2005-07-20 This book constitutes the strictly refereed post proceedings of the 5th International Workshop on Computational Logic for Multi Agent Systems CLIMA V held in Lisbon Portugal in September 2004 as a joint event in federation with the Ninth European Conference on Logics in Artificial Intelligence JELIA 04 to promote the CLIMA research topics in the broader community of logics in AI The 16 revised full papers presented were carefully selected from 35 submissions and are devoted to techniques from computational logic for representing programming and reasoning about multi agent systems The papers are organized in topical sections on foundations architectures interaction and planning and applications

Artificial Intelligence: Methodology, Systems, and Applications Fausto Giunchiglia, 1998 Content Description Includes

bibliographical references and index *Computation, Information, Cognition* Gordana Dodig Crnkovic, Susan Stuart, 2009-03-26 This book draws together a number of important strands in contemporary approaches to the philosophical and scientific questions that emerge when dealing with the issues of computing information cognition and the conceptual issues that arise at their intersections It discovers and develops the connections at the borders and in the interstices of disciplines and debates and presents a range of essays that deal with the currently vigorous concerns of the philosophy of information ontology creation and control bioinformation and biosemiotics computational and post computational approaches to the philosophy of cognitive science computational linguistics ethics and education *Cohesive Profiling* Christian R. Hoffmann, 2012-04-16 Cohesive Profiling provides one of the first linguistic descriptions of blog discourse focusing on the cohesive relations which enable users to construe blogs as compatible meaningful wholes With a corpus based analysis of cohesive relations in personal blogs the study surprisingly reveals that there is only limited cohesive rapport between the textual contributions of blog authors and readers The book retraces blogs technological linguistic and generic evolution and describes how today s blog genres are structured and composed Additionally it is shown how cohesive interaction shared knowledge and technological expertise converge in blog readers trying to keep track of blog topics purposes and identities over time The book is of interest to researchers in discourse analysis corpus linguistics and pragmatics as well as to scholars working in the field of computer mediated communication *Prolog: The Next 50 Years* David S. Warren, Veronica Dahl, Thomas Eiter, Manuel V. Hermenegildo, Robert Kowalski, Francesca Rossi, 2023-06-16 This volume was motivated by the Year of Prolog initiative launched to celebrate the 50th anniversary of the emergence of Prolog through the work of Alain Colmerauer s team in Marseille The volume editors authors and scientific advisors and reviewers have been the leading researchers and programmers in this field over decades and the book represents an excellent overview of the field its successes and its future After a first chapter that gently introduces the Prolog programming language using examples the next 7 papers discuss general views of the language possible extensions for the future and how Prolog can generally be used to solve problems the next 5 papers explore ideas and experiences of teaching Prolog programming and then 2 papers discuss technology that has been developed for help in that teaching the next 3 papers describe new languages based on Prolog which show future directions for logic programming the next 5 chapters explain the applications that were the finalists for the 2022 Alain Colmerauer Prize and the final 8 papers describe applications developed using the Prolog language demonstrating the language s range *Dynamic Logic. New Trends and Applications* Manuel A. Martins, Igor Sedlár, 2020-12-21 This book constitutes the proceedings of the Third International Workshop on Dynamic Logic DaL 2019 held in Prague Czech Republic in October 2020 Due to COVID 19 the workshop has been held online The 17 full papers presented together with 6 short papers were carefully reviewed and selected from 31 submissions The theoretical relevance and practical potential of dynamic logic is a topic of interest in a number of scientific venues from wide scope software

engineering conferences to modal logic specific events The DaL 2020 workshop is exclusively dedicated to Dynamic logic and aims at filling this gap and creating a heterogeneous community of colleagues from Academia to Industry from Mathematics to Computer Science

Tag Questions in Conversation Ditte Kimps, 2018-05-15 This monograph deals with variable tag questions These are utterances with a variable interrogative tag like It s peculiar writing isn t it and the semi variable tag innit such as Nice innit The aim is to provide a corpus based comprehensive semantic pragmatic typology of British English tag questions Compared to existing descriptions the proposed typology is novel in three ways Firstly whereas almost all existing typologies are single layered classifications the functions of tag questions are categorized into two parallel dimensions of interpersonal meaning the speech function and the stance layer Secondly semantic generalizations are proposed for clusters of grammatical intonational and conversational properties Thirdly the bottom up description is based on a sizeable amount of authentic spontaneous conversations which are analysed both qualitatively and quantitatively
