The Standard Home Reference Library, 1910 **The World Book** Michael Vincent O'Shea, Ellsworth D. Foster, George Herbert Locke, 1917 Becoming a Digital Library Susan J. Barnes, 2003-11-04 This excellent reference traces the construction and maintenance of the digital collections and services that have been available day in and day out to users worldwide for more than a decade. It examines applicable guidelines for any library looking to build and manage systems, conduct and evaluate projects and scout new directions for mainstreaming and hybridizing the building of a digital library. Including contributions from seasoned experts in specializations such as staffing, collection development and technology project management for digital libraries. *Becoming a Digital Library* discusses the techniques for finding and training the right people to build a digital library. *Astronomy* Robert Burnham, 2002 Outlook and Independent, 1897

Introducing the Stars Martin Beech, 2019-03-28 This textbook introduces the reader to the basic concepts and equations that describe stellar structure. Various approximation techniques are used to solve equations and an intuitive rather than rigorous approach is employed to interpret the properties of the stars. The book provides step by step instructions, helpful exercises and relevant historical lessons to familiarize students with key concepts and mathematical theories. Based upon a series of one semester 12 weeks elective undergraduate courses offered at the University of Regina, this book is intended for students who are interested in seeing how basic calculus and introductory physics can be applied to the understanding of the stars from their formation to their death. The text provides an intermediate stepping stone between lower level undergraduate classes and more specialized postgraduate texts on the subject of stellar structure. *The Reference Librarian's Bible* Steven W. Sowards, Juneal Chenoweth, 2018-07-26 Divided into dedicated categories about the subjects most meaningful to librarians, this valuable resource reviews 500 texts across all major fields. Drawing on their collective experience in reference services and sifting through nearly 30 000 reviews in ARBAonline, editors Steven Sowards, associate director for collection at Michigan State University Libraries and Juneal Chenoweth, editor of American Reference Books Annual, curated this collection of titles, most of which have been published since 2000 to serve collections and reference librarians in academic and public libraries. From the Encyclopedia of Philosophy and the Social Sciences and Encyclopedia of the Civil War to the Encyclopedia of Physics, Encyclopedia of Insects and Taylor's Encyclopedia of Garden Plants to the formidable Oxford English Dictionary, *The Reference Librarian's Bible* encompasses every subject imaginable and will be your first stop for choosing and evaluating your library's collections as well as for answering patrons' questions.
