Demonstrating Results Rhea Joyce Rubin, 2006 I became a librarian because of my interest in how reading affects people how it can lead to insights and help people transform their lives library services and materials help them in their efforts to change and grow Outcome measurement can assess how well libraries do that Rhea Joyce Rubin from the Preface

Library services and programs that not only meet goals but can also demonstrate these results are more likely to secure repeat funding. By evaluating and presenting outcomes, libraries can document the positive work they do in a concrete way and gain financial support. According to Planning for Results expert Rubin, outcome measurement lets libraries evaluate how they affect their users' quality of life. This latest addition to the PLA sponsored Results Series uses familiar task breakdowns along with key terms in a step by step service oriented format so that readers can master the outcome measurement process as they enhance library programs using evaluation techniques. Use and customize the 14 step by step workforms to address unique needs. Gather and interpret statistically accurate data to demonstrate outcomes. Measure, evaluate, and present outcomes to attract funding. Applying these concepts in examples and in two running case studies: an Internet class for seniors and a teen mother tutoring program brings the model to life. The Toolkit includes tips on creating evaluations, coding data, and selecting a sample. By assessing the impact of services in users' lives, public library directors and program managers demonstrate to funding bodies their accountability and the effectiveness of programs, thus positioning their libraries to secure maximum funding.
