**Tony Hunt's Structures Notebook** Tony Hunt, 2007-08-22 The purpose of the Structures Notebook is to explain in the simplest possible terms about the structure of things and to demonstrate the fact that everything you see and touch live in and use living and man made has a structure which is acted upon by natural forces and reacts to these forces according to its form and material The Structures Notebook was originally written by Tony Hunt as a brief teaching aid for students at the Royal College of Art who had very little if any knowledge of physics or structural behaviour It has now been expanded and with this second edition updated into a more comprehensive book while retaining a simple visual and non mathematical approach to structures The book is divided into seven main sections in a logical sequence and is written in simple language Each section related to its text has a comprehensive set of hand drawn sketches which show as simply as possible what the text is about The book is almost totally non mathematical since the author believes very strongly that structural behaviour can be understood best by

diagrams and simple descriptions and that mathematics for the majority of people interested in design is a barrier The design of structures is a combination of art and science and to achieve the best solution concept should always come before calculation
